

					Water / Waste / Drainage Requirements					
					Water	Drainage	Chemicals / Cleaning Fluid / Other Cleaning Product Used	Equipment specification / technical information sheet	What effluent is produced from the cleaning process? Please highlight anything in addition to: fuel, oil, lubricant, brake fluids, metal swarf, plastic particles.	Approx. Volume of Waste Liquid Produced per Week (Litres/week)
TSD CODE: T	Description	Length (Front)	Depth	CODE						
	TSD Water	1.4	0.96	T1	T1 (TSD Water) needs to be plumbed in - exact location to be confirmed by FS 21.06.23	T1 (TSD Water) to drain directly into septic tank	Water mainly. However parts are washed which have been in the following, Aqua blaster,Ozzy Juice1/2,safety kleen wash,sonic cleaner. Water will have contaminants of the above into the septic tank	Industrail sink, with water feed tap, as previously mentioned in emails.	All the above, plus contaminants from all washes.	100L Per week
	Aqua Blaster	2.5	2.5	T6	One Water Feed In Room Required	Into septic tank - but no direct drainage route from room. To be cleaned etc outside (jet wash needed). Access to be provided.	Mains water, mixed with Aluminum media	(Aqua blast 1215)Machine houses, water and media internally and is power by an internal pump. Machine is cleaned every 2 weeks into septic tank	Machine uses an aluminium media, mixed with water. Mainly the machines fluids into the septic tank, we try and seperate the media as best we can, some media will enter the tank. The rest of media in general waste at present	100L Per week
	Ozzy Juice 1	1.25	1	T12	N/A	Into septic tank - but no direct drainage route from room. To be cleaned etc outside (jet wash needed). Access to be provided.	Rowash 03 (M0604) Please see data sheet	(Rozone ozzy juice wash)see data sheet	All the above, plus pure Rowash 03. Machine checmical is not diluted	20L Per week
	Ozzy Juice 2	0.9	0.7	T13	N/A	Into septic tank - but no direct drainage route from room. To be cleaned etc outside (jet wash needed). Access to be provided.	Rowash 03 (M0604) Please see data sheet	(Rozone ozzy Juice wash)see data sheet	All the above, plus pure Rowash 03. Machine checmical is not diluted	20L Per Week
	Sonic Cleaner Station	0.45	0.45	T14	N/A	Into septic tank - but no direct drainage route from room. To be cleaned etc outside (jet wash needed). Access to be provided.	Mykal Ultrasonic cleaner plus,(aqua 22) please see data sheet, plus main water	(8895 Cole parmer)see data sheet	All the above, machine uses ratio of water and Aqua 22	10L Per Week
	Jet Wash	1.4	0.8	T38	Tap outside workshop required	Only used externally in septic tank drainage zone	Mains water feed. Can be used with vehicle shampoo and engine degreaser	Karcher HDS 745M ECO Jet wash is diesel/electrical powered. Using mains water. Used to clean, cars,vans,vehicle parts. Example- Engines	All the above	Jetwash, only used when required, unknown
RPW CODE: R	Floor cleaner	0.6	0.5	T46	N/A	Used internally, waste empited in septic tank.	Mixture of mains water and Karcher RM750 please see data sheet	Karcher Professional BR 40/10C	All the above.	30 L Per Week
	Sand Blaster	1.13+0.5	0.76	R5	N/A	Cleaned externally and therefore some waste / effluent ends up in the septic tank, not jet washed	Sand / Aluminum media	Contractor 110S	Waste Media	Doesn't get a wet wash
	Aqua Blaster	2.5	2.5	R9	One Water Feed In Room Required	Into septic tank - but no direct drainage route from room. To be cleaned etc outside (jet wash needed)	Mains water, mixed with Aluminum media	(Aqua blast 1215)Machine houses, water and media internally and is power by an internal pump. Machine is cleaned every 2 weeks into septic tank	Machine uses an aluminium media, mixed with water. Mainly the machines fluids into the septic tank, we try and seperate the media as best we can, some media will enter the tank. The rest of media in general waste at present	100L Per week
	Compressor (New)	TBC	TBC		N/A	Required - into foul water. Connection permits etc to be progressed by BCS / CPW	TBC	Equipment Spec provided	TBC	TBC
