REASON FOR RECOMMENDATION:		
<ul style="list-style-type: none"> • We have reviewed the above documents and require further information. • Please can the PEA be submitted for review. • Hedgerow numbers need included in the metric. Also, please can the 5 hedgerows be separated out into individual cells in the BNG metric for clarity. • While this point is a post-development matter – at the gain plan stage the further information is needed on post-development hedgerow creation as this tab is missing in the current metric submitted. 		

<ul style="list-style-type: none"> It should also be noted that while the urban trees fall within the LNRS ACB Urban mapped measures, the site is not situated within the ACB grassland Mapped measures, therefore, the other neutral grassland and mixed scrub strategic significance will need changed at the biodiversity gain plan stage to low strategic significance.
ANY RECOMMENDED CONDITIONS TO BE APPLIED:
<ul style="list-style-type: none"> The development shall not commence until a 30 year Habitat Monitoring and Management Plan (HMMP), prepared in accordance with an approved Biodiversity Gain Plan, has been submitted to and approved in writing by the local planning authority. The approved HMMP shall be strictly adhered to and implemented in full for its duration and shall contain the following: <ul style="list-style-type: none"> a) Description and evaluation of the features to be managed; b) Ecological trends and constraints on site that may influence management; c) Aims, objectives and targets for management - links with local and national species and habitat action plans; d) Description of the management operations necessary to achieving aims and objectives; e) Preparation of a works schedule, including annual works schedule; f) Details and a timetable of the monitoring needed to measure the effectiveness of management; g) Details of the persons responsible for the implementation and monitoring; h) mechanisms of adaptive management to account for necessary changes in work schedule to achieve the required targets; and i) Details of methodology and frequency of monitoring reports to be submitted to the Local Planning Authority to assess biodiversity gain (To enhance biodiversity, and in accordance with the National Planning Policy Framework and paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990)

Confirmation that development is subject to statutory biodiversity gain condition	Y
Pre-development Habitat Plan of existing onsite habitat (to scale)	Y
Pre-development Habitat Value (on date of application or earlier)	Y
