Dear Sir

We are pleased to see that an ecological survey has been submitted with this application (Curious Ecologists, 2009). We note from the report that there was no evidence of protected species within the application site.

However, the applicant should be reminded that protected species are mobile and may colonise the site in the future. We would therefore recommend that a watching brief be maintained by the applicant and all workers on site. In the event of any protected species being discovered works should cease whilst expert advice is sought.

We hope that our comments and recommendations will be of use to you.

Yours faithfully

Kirsty Gamble
Planning Ecologist
Historic and Natural Environment Team

Please note: Our information and recommendations result from our best knowledge of the site to date. It may change if further information is discovered. It remains the responsibility of the applicant to ensure that no protected species or their habitat is damaged during the works. The best method of achieving this is for a suitably experienced and licensed ecologist to conduct a full survey for protected species at the appropriate time of year in appropriate weather conditions.
