Dear Sir/Madam

THIS LETTER ASKS FOR YOUR ASSISTANCE & ACTION

GAS METER EXCHANGE PROGRAMME

Planned Date of Appointment: 31st October 2007

The Gas Meter in your property has been identified as being of an age that is coming to the end of its useful life. It is essential that the meter be exchanged. This work will not change your current gas supplier and all agreements between you and your gas supplier remain in place.

There is no charge for this work, which takes approximately 30 minutes. Please note access to your property is required to complete this work even if your gas meter is located outside.

A number of companies undertake this work on our behalf. Should you wish to confirm the identity of the engineer who calls please telephone the number given on the back of the Identity Card that all engineers carry.

I thank you in anticipation of assisting us to complete this necessary work. If the planned date above is not convenient then you can arrange an alternative appointment via the internet on **www.nationalgrid.com/metering** or alternatively please contact us on **0845 606 6766*.**

National Grid Metering is committed to respecting your privacy and complying with applicable data protection and privacy laws. In order to provide our services, including resolving any queries you may have, your information will be utilised by our employees, professional advisers and authorised contractors, in relation to the maintenance of your gas meter.

Yours faithfully

Steve J Monk
Delivery Manager

***Please note that telephone calls may be recorded for training purposes.**

It is the wish to render a brick wall facing the neighbour's property. We have to access her property to carry out the work, which she has consented to but not in writing. The wall in question can only be seen by two adjoining properties.

The wall is two storeys with 12 square metres area. The present brickwork has been in a poor crumbly state for some years even before it was listed. My view is rendering and painting white to complement the whole rear of the property, which is white. Rendering should be aesthetically pleasing to our neighbours.

Barry Whirrity has seen the proposals so will be able to comment on the work we wish to carry out.
