

# Bin Collection Point Changes

**Project No:** 25-083

**Project Title:** Stoke Road Hinckley

**Description:** Bin Collection Point  
Changes S02

**Planning Ref:** 22/00318/OUT

**Client:** Vistry Partnership

**Revision:** A

**Approval Date:** 18/01/24

**Expiry Date:**

**Date:** 11/12/2025

| Location    | Changes to Bin Collection Points                                                                                                                                                                                                      | Changes Proposed to Layout                                                                                                                             | Plots with Drag Distances Over Limit              |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|
| Plots 1-2   | Collection point not required. Frontage of both plots is within the 25m bin drag distance by refuse collector. Bins dragged to individual frontage on collection day                                                                  |                                                                                                                                                        |                                                   |
| Plots 6-13  | Collection point moved further into private drive to maximising the drag distance for the bin collector.                                                                                                                              | Rear path to plots 8 & 11 swapped to other side of garden to reduce occupier drag distance, path added to side of plot 6 & 13 parking to allow access. | Plot 7 – 12 still 30m+ drag distance for occupier |
| Plots 17-19 | Plot 17 will leave bins to front of property, collection point for plots 18 & 19 moved further into private drive to maximise the drag distance for the bin collector and keep the occupier drag distance from garden to 30m or less. |                                                                                                                                                        |                                                   |
| Plots 26-32 | Collection points for plots 27-29 and 30-32 moved further into private drive to keep the occupier drag distance from garden to 30m or less. Plot 26 to drag bins to property frontage.                                                |                                                                                                                                                        | Collection day drag-distance in excess of 25m.    |
| Plots 37-40 | Collection point moved closer to turning head to keep the occupier drag distance from garden to 30m or less                                                                                                                           |                                                                                                                                                        | Collection day drag-distance in excess of 25m.    |
| Plots 41-48 | Plot 48 will leave bins to front of property, collection points for plots 41 - 47 split into two and moved closer to turning head to keep the occupier drag distance from garden to 30m or less                                       |                                                                                                                                                        | Collection day drag-distance in excess of 25m.    |

| Location      | Changes to Bin Collection Points                                                                                                                                                                                 | Changes Proposed to Layout | Plots with Drag Distances Over Limit                             |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------------------------------------------------|
| Plots 59-62   | collection point moved further into private drive to to keep the occupier drag distance from garden to 30m or less                                                                                               |                            | Collection day drag-distance in excess of 25m                    |
| Plots 67-70   | Plot 67 will leave bins to front of property, collection point for plots 67 – 70 moved further into private drive to keep the occupier drag distance from garden to 30m or less.                                 |                            |                                                                  |
| Plots 71-73   | Plot 73 will leave bins to front of property, collection point for plots 71 & 72 moved further into private drive to keep the occupier drag distance from garden to 30m or less.                                 |                            |                                                                  |
| Plots 79-82   | Plots 79 & 80 will leave bins to front of property, collection point for plots 81 & 82 moved further into private drive to keep the occupier drag distance from garden to 30m or less.                           |                            |                                                                  |
| Plots 83-84   | Collection point not required. Frontage of both plots is within the 25m bin drag distance by refuse collector. Bins dragged to individual frontage on collection day.                                            |                            |                                                                  |
| Plots 95-96   | Collection point not required. Frontage of both plots is within the 25m bin drag distance by refuse collector. Bins dragged to individual frontage on collection day.                                            |                            |                                                                  |
| Plots 97-100  | Plot 100 will leave bins to front of property, collection point for plots 97 - 99 moved further into private drive to keep the occupier drag distance from garden to 30m or less.                                |                            |                                                                  |
| Plots 106-109 | Plot 106 will leave bins to front of property, collection point for plots 107 – 109 moved closer to turning head to keep the occupier drag distance from garden to 30m or less.                                  |                            | Collection day drag-distance in excess of 25m.                   |
| Plots 132-137 | Plot 132 will leave bins to front of property, collection point for plots 133 - 137 split into two and moved closer to turning head to keep the occupier drag distance from garden to 30m or less                |                            | Collection day drag-distance for plots 134-137 in excess of 25m. |
| Plots 138-139 | Collection point moved further into private drive to keep the occupier drag distance from garden to 30m or less.                                                                                                 |                            |                                                                  |
| Plots 150-154 | Bin lorry to enter private drive making use of turning head. Collection point for plots 150 - 154 split into two and moved closer to turning head to keep the occupier drag distance from garden to 30m or less. |                            | Collection day drag-distance in excess of 25m.                   |

| Location            | Changes to Bin Collection Points                                                                                                                                                                                   | Changes Proposed to Layout                                                 | Plots with Drag Distances Over Limit                             |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|------------------------------------------------------------------|
| Plots 317-324       | Plot 324 will leave bins to front of property, collection points for plots 317 - 323 split into two and moved further into private drive to keep the occupier drag distance from garden to 30m or less             |                                                                            | Collection day drag-distance for plots 317-320 in excess of 25m. |
| Plots 338-340       | Plot 338 will leave bins to front of property, collection point for plots 339 & 340 moved further into private drive to keep the occupier drag distance from garden to 30m or less.                                |                                                                            | Plot 339 still 30m+ drag distance for occupier.                  |
| Plots 341-344       | Plot 341 will leave bins outside garden gate of property, collection point for plots 342 & 344 moved further into private drive to keep the occupier drag distance from garden to 30m or less.                     |                                                                            | Plots 342 & 343 still 30m+ drag distance for occupier.           |
| Plots 396-397 & 384 | Collection point not required. Frontage of all plots is within the 25m bin drag distance by refuse collector. Bins dragged to individual frontage on collection day                                                |                                                                            |                                                                  |
| Plots 398-399       | Collection point not required. Frontage of both plots is within the 25m bin drag distance by refuse collector. Bins dragged to individual frontage on collection day                                               |                                                                            |                                                                  |
| Plots 408-414       | Collection points for plots 408 - 414 split into two and moved further into private drive to keep the occupier drag distance from garden to 30m or less                                                            | Paths added to layout to allow bins to be dragged from frontage to street. | Collection day drag-distance for plots 411-414 in excess of 25m. |
| Plots 420-426       | Collection points split. Plots 420 & 421 will leave bins to front of property, collection point for plots 422 - 426 moved further into private drive to keep the occupier drag distance from garden to 30m or less | Paths added to layout to allow bins to be dragged from frontage to street. | Collection day drag-distance for plots 422-426 in excess of 25m. |
| Plots 427-428       | Collection point moved further into private drive to keep the occupier drag distance from garden to 30m or less.                                                                                                   |                                                                            |                                                                  |
| Plots 436-439       | Collection points split. 436 & 437 remain in original location, 438 & 439 moved further into private drive to keep the occupier drag distance from garden to 30m or less.                                          |                                                                            |                                                                  |
| Plots 440-442       | No change.                                                                                                                                                                                                         |                                                                            |                                                                  |
|                     |                                                                                                                                                                                                                    |                                                                            |                                                                  |

| Location      | Changes to Bin Collection Points                                                                                                                                                   | Changes Proposed to Layout                                                                                 | Plots with Drag Distances Over Limit |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|--------------------------------------|
| Plots 455-459 | Plots 455 & 456 will leave bins to front of property, collection point for plots 457 - 459 moved further into private drive to maximise the drag distance for the bin collector.   | Path added between parking for plots 457 & 458 to keep drag distance for occupiers of 457 & 458 below 30m. |                                      |
| Plots 460-763 | Plot 463 will leave bins to front of property, collection point for plots 460 - 462 moved further into private drive to keep the occupier drag distance from garden to 30m or less | Paths added to layout to allow bins to be dragged from frontage to street.                                 |                                      |
