Morning Asheigh,

Please find attached the amended BNG documents following the County comments dated 02.07.25 and for the avoidance of doubt, the amendments make no difference to the metric(s) which remains unchanged.

What has changed however, is the approach to meeting the 10% gain which will now be secured by an off-site contribution that I'll confirm the details of shortly.

With the BNG element now settled, have you heard from Highways as Public Access is down this morning and is there anything else that needs addressing so we can meet the target date of 4th August 2025?

Kind Regards,

Simon
