Good Afternoon
Apologies I am unable to enter the comments on the Portal as I am awaiting a reset password link

To whom it may concern,
Re Application: 25/00627/FUL
Re Site: Former Factory Works Upper Bond Street Hinckley Leicestershire

With reference to the above planning application the Company's observations regarding sewerage are as follows.

Severn Trent requests that any approval be conditioned as follows:

The development hereby permitted should not commence until drainage plans for the disposal of foul and surface water flows have been submitted to and approved by the Local Planning Authority. The scheme shall be implemented in accordance with the approved details before the development is first brought into use. Planning Practice Guidance and section H of the Building Regulations 2010 detail surface water disposal hierarchy. The disposal of surface water by means of soakaways should be considered as the primary method. If this is not practical and there is no watercourse available as an alternative, other sustainable methods should also be explored. If these are found unsuitable satisfactory evidence will need to be submitted before a discharge to the public sewerage system is considered. No surface water to enter the foul or combined water systems by any means.

Reason

To ensure that the development is provided with a satisfactory means of drainage as well as reduce the risk of creating or exacerbating a flooding problem and to minimise the risk of pollution.

IMPORTANT NOTE: With regard to network capacity, this response only relates to the public waste water network and does not include representation from other areas of Severn Trent Water, such as the provision of water supply or the protection of drinking water quality.

Please note for the use or reuse of sewer connections either direct or indirect to the public sewerage system the applicant will be required to make a formal application to the Company under Section 106 of the Water Industry Act 1991. They may obtain copies of our current guidance notes and application form from either our website (<http://www.stwater.co.uk/>) or by contacting our Developer Services Team (Tel: 0800 707 6600).

Suggested Informative – affected sewers and water mains Before undertaking any work on site, all applicants must determine if Severn Trent has any assets in the vicinity of the proposed works. This can be done by accessing our records at <http://www.digdat.co.uk/>

Severn Trent Water advise that even if our statutory records do not show any public sewers within the area you have specified, there may be sewers that have been recently adopted under The Transfer of Sewer Regulations 2011.

Our records indicate that there are no assets that may be affected by this proposal, however it is the duty of the site owner to confirm this is the case before any work takes place.

Public sewers and Water mains have statutory protection and may not be built close to, or diverted without consent, consequently you must contact Severn Trent Water to discuss your proposals. Severn Trent will seek to assist you obtaining a solution which protects both the public sewer and the proposed building.

Additional information

If the development site includes a Vehicle Wash / Petrol Station / Swimming Pool / Industrial Processes, or anything else that may discharge waste other than foul sewage or surface water into the public network, we would strongly recommend the applicant speaks to the Trade Effluent Support Team before requesting a discharge of any drainage related condition. The team can be contacted by email: trade.effluent@severntrent.co.uk.

Should you require any further information please contact us on email below.

Yours faithfully,

Severn Trent
Asset Protection Team
