

Application for Tree Work (Ref Martin-9884)

**0801/11/06 - THE BOROUGH COUNCIL OF HINCKLEY AND BOSWORTH HINCKLEY (ROSTON DRIVE)
TREE PRESERVATION ORDER 1974**

Miss Gill Martin
104 Roston Drive
Hinckley
Leicester
LE10 0XP

Note: Not to scale

Reason for application

- Triple-stem Ash T1 (possibly T10 on TPO but difficult to tell from plan): This triple-stemmed ash is showing early signs of ash dieback. It has sparse foliage, clumping foliage and an increase in dead wood. It is dropping debris onto garden and pavement. The owner is concerned about debris and liability. We could possibly remove the two outer stems to reduce the crown volume and reduce and reshape the remaining central stem, however the top of the central stem is poor and unlikely to be a viable long term option. In view of the

probable deterioration and therefore future risk, we would propose to remove all three stems to ground level.

Evidence to verify application

- Visual inspection by Julian Mitchell (Professional Tree Inspection, RFS Cert Arb) of Totally Trees Ltd;
- Photos attached as evidence: Pics 1 & 2 - overall crown with sparse and clumping foliage
- Pic 3 - view of top of central stem from beneath showing poor physiological condition
