

Appendix

4.2

Extended ZTV

Zone of Theoretical Visibility

Proposed Turbine

Map Details

Map illustrates the Zone of Theoretical Visibility (ZTV) within a 10km radius of the proposed turbines, calculated using the highest point of the turbine (tip height)

The ZTV is computer generated in ReSoft Windfarm V5 using OS landform terrain 50 data and takes into account natural and built features within the landscape. All barriers are considered by the software to obscure the development entirely with no demonstration of filtered views or partial screening. The earth's curvature and atmospheric refraction are included. Viewer height above the ground is 1.7m.

Scale: 1:80,000 @ A3
