SUMMARY OF ECOLOGICAL DOCUMENTS CONSIDERED:		
- The proposed development consists of a 1.5-meter extension of the existing garage. The development is sited in close proximity to nearby countryside and has good habitat connectivity, however following discussions about the nature of this development and the limitations to this specific application, we withdraw our holding objection. - Conversely, the following informative should be attached to any permission, given the good connectivity to the wider habitat.

RECOMMENDED INFORMATIVES TO BE APPLIED:
The property may be suitable for roosting bats, which are protected by law from harm. It is the applicant's responsibility to ensure that bat legislation is not breached, and therefore may need to consult with a licenced bat ecologist prior to commencement to ensure that bats will not be impacted by the works. The applicant should ensure that all contractors and individuals working on the property are aware of this possibility, as works must cease if bats are found during the course of the works whilst advice from a bat ecologist is obtained. Bats are particularly associated with the roof structure of buildings, including lofts, rafters, beams, gables, eaves, soffits, flashing, ridge-tile, chimneys, the under-tile area, etc. but may also be present in crevices in stone or brickwork and in cavity walls.
RECOMMENDED SECTION 106 REQUIREMENT (standard clause, contribution amount, trigger for payment)
