

Please see attached photographs 1-5 of the current landscaping. At the proposed location, the ground is flat rough grassland, which then rises by approximately 8 feet to the corner of the site.

The container is currently orange. It can be painted in more muted colours to help it blend in with the hedge line.

Subject to the landowners permission, more native shrubs such as hawthorn and holly can be planted in the hedgerow to soften and screen the container from the road.
