Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 21/05/2026 8:26 AM from William Kelly (william.kelly@leics.gov.uk) on behalf of LCC Archaeology - Historical And Natural Environment Team.

Application Summary

Reference:	26/00428/FUL
Address:	Land Off Charity Close Desford Leicestershire
Proposal:	Full application for residential development of 83 dwellings with associated vehicular access, footpaths, public open space, landscaping and drainage infrastructure including pumpstation.
Case Officer:	Sullivan Archer

Comments Details

Dear Sullivan,

26/00428/FUL | Full application for residential development of 83 dwellings with associated vehicular access, footpaths, public open space, landscaping and drainage infrastructure including pumpstation. | Land Off Charity Close Desford

Comments: Archaeological considerations

Thank you for your consultation on the above planning application. We recommend that you advise the applicant of the following archaeological requirements, for post-determination trial trenching.

Consideration of the submitted Heritage Statement (RPS Report

Ref.: 794-PLN-HER-00945) and the Leicestershire and Rutland Historic Environment Record (HER) indicates that the development site possesses an uncertain, but modest archaeological interest. Unfortunately the presence of green waste/scattered ferrous debris across the majority of the site has reduced the reliability of the geophysical survey to identify anomalies with a potential archaeological origin. Given the results of the heritage statement and in light of the investigations undertaken for the adjacent site, we are however satisfied that the likely archaeological implications are manageable through a programme of staged archaeological investigation, secured by condition on any future planning approval.

In accordance with National Planning Policy Framework (NPPF), Section 16, paragraph 207, the development area is of archaeological interest and also has the potential for further unidentified archaeological deposits. Based upon the available information, it is anticipated that these remains whilst significant and warranting further archaeological mitigation prior to the impact of development, are not of such importance to represent an obstacle to the determination of the application (NPPF paragraph 208).

While the current results are sufficient to support the planning decision, further post-determination trial trenching will be required in order to define the full extent and character of the necessary archaeological mitigation programme.

NPPF paragraph 218, states that Local Planning authorities should require developers to record and advance understanding of the significance of any heritage assets to be lost (wholly or in part) in a manner proportionate to their importance and the impact of development, and to make this evidence (and any archive generated) publicly accessible.

In that context it is recommended that the current application is approved subject to conditions for an appropriate programme of archaeological mitigation, including an initial phase of exploratory trial trenching, followed, as necessary by intrusive and non-intrusive investigation and recording. The Historic & Natural Environment Team (HNET) will provide a formal Brief for the latter work at the applicant's request.

If planning permission is granted the applicant must obtain a suitable written scheme of Investigation (WSI) for both phases of archaeological investigation from an organisation acceptable to the planning authority. The WSI must be submitted to the planning authority and HNET, as archaeological advisors to your authority, for approval before the start of development. They should comply with the above mentioned Brief, and with relevant Chartered Institute for Archaeologists "Standards" and "Code of Practice". It should include a suitable indication of arrangements for the implementation of the archaeological work, and the proposed

timetable for the development.

We therefore recommend that any planning permission be granted subject to the following planning conditions (informed by paragraph 37 of Historic England's Managing Significance in Decision-Taking in the Historic Environment GPA 2), to safeguard any important archaeological remains potentially present:

1. No demolition/development shall take place/commence until the necessary programme of archaeological work has been completed. The programme will commence with an initial phase of trial trenching to inform a final archaeological mitigation scheme. Each stage will be completed in accordance with a written scheme of investigation (WSI), which has been [submitted to and] approved by the local planning authority in writing. For land that is included within the WSI, no demolition/development shall take place other than in accordance with the agreed mitigation WSI, which shall include the statement of significance and research objectives, and

- The programme and methodology of site investigation and recording and the nomination of a competent person(s) or organisation to undertake the agreed works
- The programme for post-investigation assessment and subsequent analysis, publication & dissemination and deposition of resulting material. This part of the condition shall not be discharged until these elements have been fulfilled in accordance with the programme set out in the WSI.

Reason: To ensure satisfactory archaeological investigation, recording, dissemination and archiving

The Written Scheme of Investigation (WSI) must be prepared by an archaeological contractor acceptable to the Planning Authority. To demonstrate that the implementation of this written scheme of investigation has been secured the applicant must provide a signed contract or similar legal agreement between themselves and their approved archaeological contractor.

The Historic and Natural Environment Team, as advisors to the planning authority, will monitor the archaeological work, to ensure that the necessary programme of archaeological work is undertaken to the satisfaction of the planning authority.

Please will you ensure a copy of the Decision Notice is sent to us in due course, to enable us to continue to monitor and safeguard the archaeology of this site. Should you or the applicant have any further queries please do not hesitate to contact us.

Yours sincerely,

William

Kind regards
