

The historical maps shown were reproduced from maps predominantly held at the adopted for England, Wales and Scotland in the 1840's. In 1854, the Ordnance Survey (OS) began publishing maps of the country. These maps were used to update the 1:10,560 maps. The published date of the maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with significant inaccuracies in outlying county or group of counties giving rise to important inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Hinckley Phase 4

The historical maps shown, were reproduced from maps predominantly held at the time adopted for England, Wales and Scotland in the 1940's. There are 2,350 of the 1:10,560 maps published, data given therefore is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in adjoining areas. In the late 1940's a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Historical Aerial Photography

Published 1950

Source map scale - 1:10,560

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1250 and 1:10,560 from Air Force photography. They were produced between 1944 and 1950 as a security measure, pending the production of aerial photography from the RAF. The photos were checked for potentially unsafe information with security sites replaced by fields or clouds. The original editions were withdrawn and only later made available after a period of fifty years although due to the accuracy of the editing, without viewing both revisions it is not easy to spot the edits. Where available Landmark have included both revisions.
