RECEIVED

Mr Reddyps

A Quick letter to say that the latest date for the roof was 26 Feb 2008 to I have copied to the Ecological team in Leicester who emailed you. a curious Ecologist in Coalville.
The Roof was completely taken off, felted & insulated and retiled using a fibre cement Slate. + New lead flashing to all 4 chimneys and Velux windows p

Regarding Newts I do only [illegible] established concrete that will be likely not virgin land.

I have also done a visual inspection of and around the roof, IE: Droppings etc

If I have any doubt now [illegible] later, I would not hesitate to contact the Ecological team for advice.

Yours faithfully
