

REPLACEMENT DOOR AND FRAME

BURBAGE & DISTRICT CONSTITUTIONAL CLUB BUILDING

ADDITIONAL INFORMATION – APPLICATION FOR BUILDING CONSENT

The Club wish to renew the front door and frame of the door to the left of the building. This is the door that is used for all to access the main building. It is in need of replacement due to the fact that the frame is rotting and the door is not sitting close enough to the frame. To replace the door and frame would give stability and security for the building together with the fact that the door is not weather-proof so not cost effective during the winter months.

It is the Club's intention to replace this with a Mahogany door and frame which will replicate the existing 6 panelled style door with fanlight detailed frame to reflect the history of the building.
