Application to vary condition 2 and 10 of planning permission2009/0466/04

for E Taylor Skip Hire and Recycling Limited.

This application is in part retrospective, the boundary wall having been erected although some of the palisade remains to be removed.

The applicant has erected the 4 metre high walls and painted them green to prevent unauthorised access into the site and to minimise the views into the site from the nearest properties and the public footpath on the western flank of the site.

The wall sits between the tree planting and landscaping on the flank of the site and the operational area. It provides a distinct barrier between the site and the open fields to the west. The wall has been painted green as advised by the County Council.
