Categories: Yasmin

Planning Team,

National Gas Transmission (NGT) notes that it was not consulted on the original planning application (23/00613/FUL), despite the presence of NGT's FM14 Churchover to Alrewas in the vicinity of the site.

NGT's review is therefore limited to the information submitted as part of the current variation of conditions application and should not be taken as acceptance, approval or endorsement of the wider development.

Based on the information currently available, NGT has identified no additional concerns arising from the proposed amendments. However, NGT reserves all rights in respect of its apparatus, easements and access requirements and reserves the right to review its position should further information become available or should the proposals change.

Any works affecting NGT apparatus, easement rights or future access requirements may require separate assessment and approval outside of the planning process.

Subject: Planning Application 26/00568/CONDIT National Gas enquiry GW3_42382209

Planning Team,

We have been made aware of a planning application that we haven't been consulted on through your Council.

There are National Gas Transmission assets in this area. I have raised an enquiry at [LSBUD.co.uk](http://lsbud.co.uk) and have received a High Risk response. I have attached the enquiry for your reference and passed it to an engineer to review.

If you would like to view if there are any other affected assets in this area, please raise an enquiry with www.lsbud.co.uk. Additionally, if the location or works type changes, please raise an enquiry.
