Hi Planning,

National Gas Transmission does not object to the proposed works.

No Objection:

National Gas Transmission operates a high-pressure gas pipeline - FM 04 in the vicinity of the proposed single story extension.

The pipeline has an 24.4m wide easement in operation (12.2m either side of pipeline). No development, construction or landscaping is permitted within the easement without formal written approval from National Gas Transmission.

The pipeline has a 76m 'Building Proximity Distance' (BPD), which restricts development within this distance. Further guidance for consultation zones around a Major Hazard Pipeline can be found at:

<https://www.hse.gov.uk/landuseplanning>

It is the Local Authority & Developer's responsibility to ensure that the requirements of LUP are adhered to.

All work must be carried out in accordance with National Gas Transmission specification T/SP/SSW/22.
