Submission Type:
Customer wishes to comment on the Planning Application.

Comments:
Dear Mr.Wright,
Firstly, I'd like to say that I have no objection in principle to the proposed application at 50 Main Street.
My garden backs on to that of 50 Main St.& a large ash tree (subject to preservation

order) is sited there. My concern however, is for the tree which overhangs our neighbours garden. The proposed orangey would be quite close to the tree. Within the last 2 years a large limb has been removed from the tree along with other pruning to it at the request of the owners of 50 Main st (air quality & light conditions being the reasons for the application & permission given).Having spoken to many tree surgeons -the less work done on these old trees the better as they open up to infection & disease.
As the previous work on the tree was done to enable more light & air to the existing house I would hope that building an orangey within close proximity to the tree will not lead to more pruning etc.which would otherwise not be necessary, putting this lovely ash tree at risk. Surely this new structure should not in any way dictate any future work on this tree.I hope you will discuss this concern with the tree preservation dept.
