<b>Holding Objection - Further information required</b>		✓
<b>REASON FOR RECOMMENDATION:</b>		
<ul style="list-style-type: none"> <li>• No ecology survey has been submitted with the application; an ecology walkover survey of the application site will be required and assessment of the garage to be demolished. This is to establish the presence of protected species and any mitigation or licencing requirements.</li> <li>• <b>There is a holding objection until this is received.</b></li> <li>• The ODPM Regulations require protected species surveys to be submitted prior to determination of a planning application. It is also essential that the extent that they may be affected by the proposed development is established before the planning permission is granted. Reference: Paragraph 99 of ODPM Circular 06/2005 (Biodiversity and Geological Conservation – Statutory Obligations and their Impact within the Planning System). Therefore, any further surveys recommended within the report would need to be carried out prior to determination.</li> </ul>		

**BNG Specific**

- No pre-development habitat map has been submitted with the application.
- No condition assessment sheets have been submitted with the application.
- **There is a holding objection until these are received.**
- Currently, the 10% Biodiversity Net Gain will not be met on site with a -11.57% decrease in Habitat Units.
- The post development value of the site will still need to achieve a 10% net gain by discharge of the Biodiversity Gain Plan condition, either on-site or off-site by creating/enhancing off-site habitat or by purchasing habitat bank/credits.
- Any off-site enhancements will need to be secured for a period of 30 years either by condition, S106 or conservation covenant.
- A Habitat Management and Monitoring Plan (HMMP) and Biodiversity Gain Plan will also need to be secured by condition. **Please see recommended Conditions.**

**ANY RECOMMENDED CONDITIONS TO BE APPLIED:**

- **HMMP** - The development shall not commence until a 30 year Habitat Monitoring and Management Plan (HMMP), prepared in accordance with an approved Biodiversity Gain Plan, has been submitted to and approved in writing by the local planning authority. The approved HMMP shall be strictly adhered to and implemented in full for its duration and shall contain the following:
  - a) Description and evaluation of the features to be managed;
  - b) Ecological trends and constraints on site that may influence management;
  - c) Aims, objectives and targets for management - links with local and national species and habitat action plans;
  - d) Description of the management operations necessary to achieving aims and objectives;
  - e) Preparation of a works schedule, including annual works schedule;
  - f) Details and a timetable of the monitoring needed to measure the effectiveness of management;
  - g) Details of the persons responsible for the implementation and monitoring;
  - h) mechanisms of adaptive management to account for necessary changes in work schedule to achieve the required targets; and
  - i) Details of methodology and frequency of monitoring reports to be submitted to the Local Planning Authority to assess biodiversity gain
- (To enhance biodiversity, and in accordance with the National Planning Policy Framework and paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990)
