

PROPOSED FLOOR PLAN 1:50

Solar panels 2 sets of 6 panels located between the proposed roof lights

Flat roof covered area for vending machines

Air sourced heat pump unit mounted on flat roof between the two pitched roof barns

PROPOSED ROOF PLAN 1:100

PROPOSED PADEL COURT NTS

All padel courts require rebound ends (with fencing above) to a total height of 4.0m. The first 3.0m, from playing surface level, can comprise any transparent material (Glass, Perspex) which does not affect ball rebound, with the upper 1.0m comprising weld-mesh fencing 50mm x 50mm mesh with the inner face being the horizontal mesh.

The transition between adjacent mesh and glass internal surfaces should be flush and neither surface should protrude further than the other as irregular ball rebound will result.

If glass is to be used for the rebound ends then the thickness can 12mm toughened glass (for outdoor courts). Glass rebound panels shall incorporate counter sunk fixings to avoid affecting ball bounce and all shall be individually kite marked to the European Standard. Glass and weld mesh panels are supported by steel posts or framed steel panels with base plates for fixing to the concrete ring beam.

Court floor finish colour is to be green to blend in with its surroundings. with black steel framing to support glass and mesh.

Lighting to be low volatage LED down-lights shielded to prevent light polution on 5.0m poles 4 No. per court.
