# THE CODE FOR SUSTAINABLE HOMES

## FINAL CERTIFICATE

(Issued at the Post Construction Stage)

Certificate Number: RDL-0000523-PCS-0023680

Score: 61

### What Your Code Star Rating Means

| Combined Score | 36-47 | 48-56 | 57-67 | 68-83 | 84-89 | 90-100 |
|----------------|-------|-------|-------|-------|-------|--------|
| Stars          | 1     | 2     | 3     | 4     | 5     | 6      |

The Code for Sustainable Homes considers the effects on the environment caused by the development and occupation of a home. To achieve a star rating a home must perform better than a new home built to minimum legal standards, and much better than an average existing home.

| How this home scored  |     |                                       |    |    |    |    |    |    |    |    |     |                                                                                                              |
|-----------------------|-----|---------------------------------------|----|----|----|----|----|----|----|----|-----|--------------------------------------------------------------------------------------------------------------|
| Category              |     | Percentage of Category Score attained |    |    |    |    |    |    |    |    |     | What is covered in the category                                                                              |
|                       |     | 10                                    | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 |                                                                                                              |

Further detailed information regarding The Code for Sustainable Homes can be found at [www.communities.gov.uk/thecode](http://www.communities.gov.uk/thecode)

The CO<sub>2</sub> rating is a measure of a home's Carbon Dioxide (CO<sub>2</sub>) emissions. This rating is shown on your Energy Performance Certificate as the Environmental Impact Rating. This Certificate is available from the seller, and also includes information on how you can improve the home's performance.

The Code measures the sustainability of a home as a complete package, and takes into account other aspects of energy use as well as wider sustainability issues, such as water and waste.

The CO<sub>2</sub>/Environmental Impact Rating is shown here for information only and does not form part of The Code for Sustainable Homes. Neither Robust Details nor the assessment organisation is responsible for the accuracy of this number.

This certificate remains the property of Robust Details Ltd and is issued subject to terms and conditions. It is produced from data supplied by the licensed Code assessor. To check the authenticity of this certificate, please contact Robust Details Ltd.
