Holding Objection - Further information required	
Condition recommended	
Informative recommended	☒
REASON FOR RECOMMENDATION PROVIDED:	
- The proposed development is situated in a landscape with good habitat connectivity bats, however the extension will have a limited impact on the existing roof structure. - I have viewed the existing building on google street-view, and it appears to have low suitability for roosting bats, therefore, requesting surveys would not be proportionate. - I would, however, recommend the below informative is attached to any permission.

RECOMMENDED INFORMATIVES TO BE APPLIED:
The property may be suitable for roosting bats, which are protected by law from harm. It is the applicant's responsibility to ensure that bat legislation is not breached, and therefore may need to consult with a licenced bat ecologist prior to commencement to ensure that bats will not be impacted by the works. The applicant should ensure that all contractors and individuals working on the property are aware of this possibility, as works must cease if bats are found during the course of the works whilst advice from a bat ecologist is obtained. Bats are particularly associated with the roof structure of buildings, including lofts, rafters, beams, gables, eaves, soffits, flashing, ridge-tile, chimneys, the under-tile area, etc. but may also be present in crevices in stone or brickwork and in cavity walls.
