

ADDENDUM
25th April 2023

75a Newbold Road, Barlestone CV13 0DT
Drainage Report
Report No: 1784/01 A

As per the drainage report, the proposed storm connection was to be made into Severn Trent Water's (STW) network.

Following detailed discussions with STW regarding the storm connection, STW have advised that we are not able to discharge any storm water from this development into their system due to concerns regarding flooding, please see enclosed emails.

We have also carried out tests to see if soakaways work on this site, but they do not, please see enclosed report.

Following discussions with the County Council, and a CCTV survey of their asset at their request, we are now proposing to connect the storm water into the County Council's highway network. Please refer to the enclosed updated drainage drawings 1784 C01 B and 1784 C01.1 B which show the newly proposed location of the storm connection.
