Comments Details

As per my original comments the submitted spec sheet for the appliance shows (both listed models) a sound power level of 61dBA.

The applicant has used a sound power level of 58dBA in the MCS 020(a) assessment.

Comments: Using the submitted data for the proposed appliance (61dBa) results in an exceedance of the MCS 020(a) criteria at 8 Northfield Road and a marginal exceedance at 4 Northfield Road.

Revised guidance is available from the CIEH/IOA (Air Source Heat Pumps Professional Advice Note (2026)) and a level 1 assessment should be carried out.

Kind regards
