The proposed development relates to a site in the settlement boundary of Burbage. As such, there is a presumption in favour of sustainable development.

It is considered that through careful design and a consideration into the visual impacts of the development that the proposal could be achieved in terms of limiting impacts upon the character of the area.

Similarly to the above section, it is considered that the delivery of a 3G pitch located in lieu of the existing rugby pitch. The pitch itself is not considered to cause any detrimental impacts upon neighbouring residential amenity however, consideration will need to be given to the impacts of associated structures. In addition, the consultation document submitted under this pre-application alluded to levels of noise mitigation being included within the site, further details of this would be required to be submitted.

In summary, the proposal has the strategic justification required by playing field policy exception 5, and subject to the satisfactory submission of the detail at formal application stage outlined above, the proposal appears capable of complying with the exception's requirements.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
