

Old School, 53 Leicester Road, Groby, LE6 0DQ

Application for planning permission for tree work.

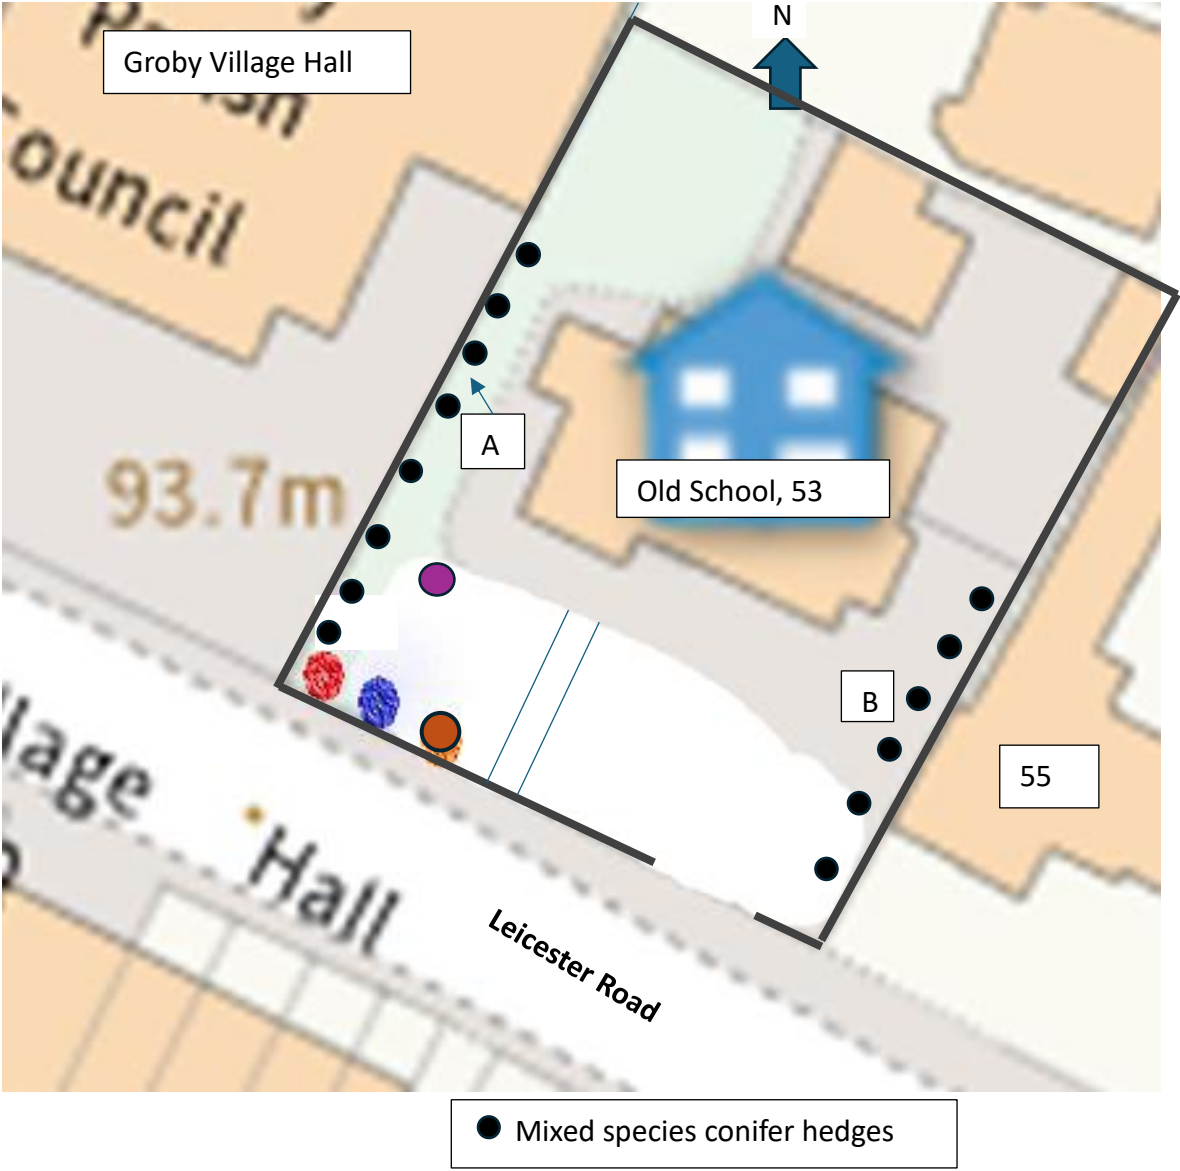

The Old School is a grade 2 listed building constructed in 1873. The trees are within the grounds of the Old School forming two hedges on our side of the boundary walls, with the Village Hall to the West and number 55 to the East. The trees are not subject to a tree protection order. We have not seen birds or bats nesting in these trees, but the work will be done after nesting season (mid September onwards).

The mixed species conifer hedges (Lawson's Cypress and Western Red Cedar) have grown very tall and we ask permission to reduce them in height to about the height of the top of the porch roof and shear to shape as they are blocking light to the house, especially the kitchen.

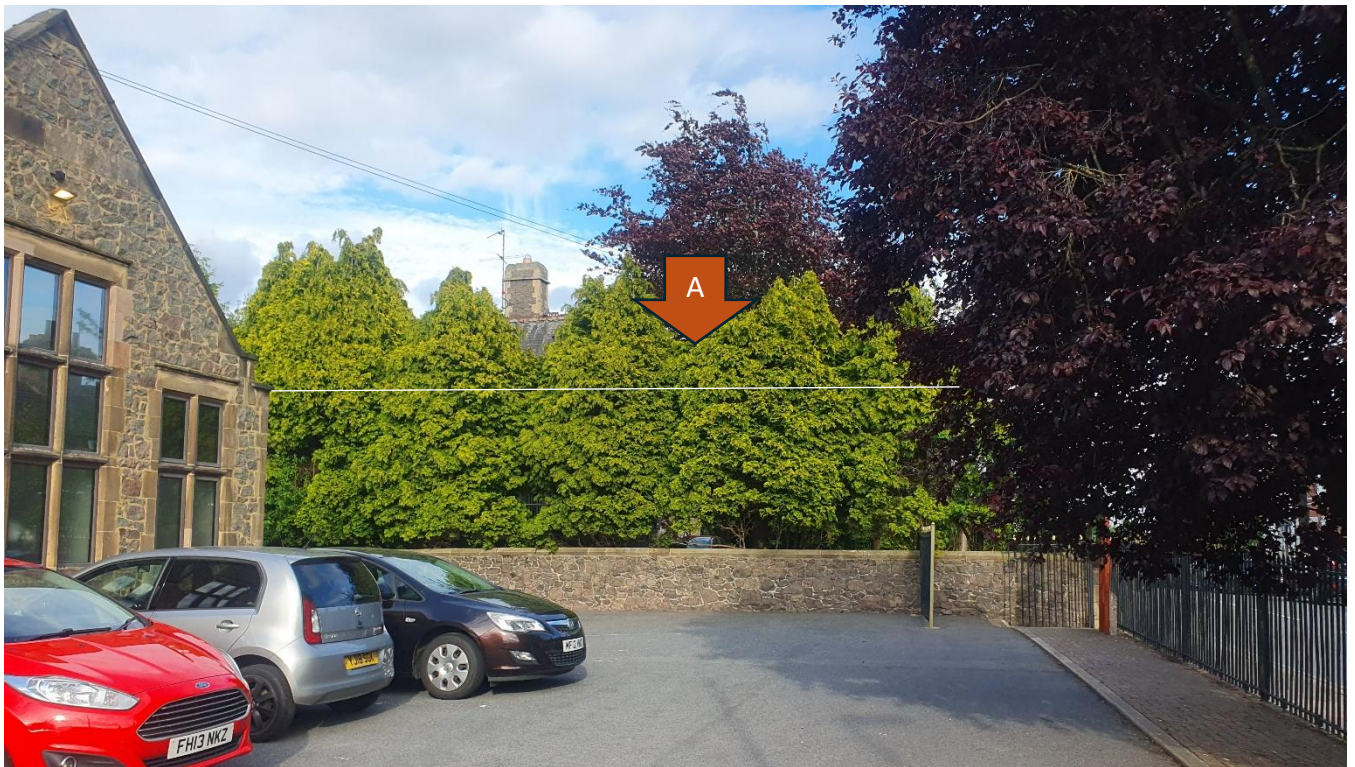

The trees at the Old School are in the Groby conservation area.

Plan of the site with conifer hedge trees marked as black circles

Trees in hedge A (viewed from the West side) (with white line to indicate proposed height)

Trees in hedge B (viewed from the West side) (with white line to indicate proposed height)
