Notes to Applicant

You are advised that consent is valid for a period of two years commencing from the date permission is granted, the works for this consent may only be carried out once unless stated otherwise by condition.

This permission does not affect any private property rights and does not authorise the applicant to carry out work on land outside of their control. The applicant is therefore required to obtain the landowners consent prior to commencing any works.

It is a criminal offence to disturb or harm bats, or to damage, destroy, or obstruct a roost. Therefore if the tree is mature and has hollow cavities, is covered with ivy or has a suitable habitat in which bats may roost we recommend that it be surveyed for bats before any work is carried out.

The Wildlife and Countryside Act 1981 offers protection to wild birds, their eggs and nests. It is an offence for any person to intentionally take, damage or destroy the nest of any wild bird while it is in use or being built or to take or destroy the egg of any wild bird. We therefore recommend that work to trees is done outside the nesting season - i.e. between the end of August and beginning March. If work is to be undertaken during the bird breeding season, we recommend that a suitably qualified ecologist surveys the tree for nesting birds. If nesting birds are present, work must be postponed until the young have left the nest.

You are advised that if a tree in a conservation area is removed, uprooted or destroyed without permission, in contravention of section 211 of the Town and Country Planning Act 1990, the landowner is placed under a duty to plant another tree of an appropriate size and species in the same or similar position as soon as they reasonably can.
