TITLE

Topographical Survey

Scale	1:200@A2	Date	05.10.2022
Drawn	HF	Checked	RP
Level datum	GNSS	Grid orientation	GNSS
Job number	5303	Revision	0
Drawing no.	5305	Sheet	2 of 2

Notes:

All critical measurements should be checked on site prior to design. No liability will be taken for this plan if based on 3rd parties. Trees and other survey data may be omitted due to dense vegetation. Some services may have been omitted due to parked vehicles and vegetation. Please note the drainage information has been ascertained by visual inspection from the surface and therefore values are estimated.

This survey has been orientated to the Ordnance Survey (OS) national grid via a Global Navigation Satellite System (GNSS) and the OS Active Network (OS AN). A true OS2000 coordinate has been established near to the site centre via a transformation using the OS2000 & OS2005 transformation models. The survey has been orientated to the point and a further one or more OS2005 points established to create a true OS bearing for angle orientation. No scale factor has been applied to the survey therefore the coordinates shown are arbitrary and not true OS coordinates.

Please refer to the survey station table to enable establishment of the on-site grid.
