REASON FOR RECOMMENDATION PROVIDED:	
The Small Sites Metric was submitted along with a proposed planting plan.	
BIODIVERSITY NET GAIN (BNG) specific comments:	
- It is assumed that mandatory biodiversity net gain applies to this site as no information has been provided to demonstrate that the development is exempt. - The small sites metric show habitat creation (individual trees and introduced shrub) within the boundaries of the private gardens. As per the Biodiversity Net Gain user guide, the creation of other new habitats within private gardens cannot be counted as anything other than 'vegetated garden' because the management and retainment cannot be ensured. - In this instance unless the development can be restricted so less than 25m² of vegetation is impacted (or less than 5m of hedgerow), offsetting will be required. This will require reaching out to local offsetting providers to see if units are available to purchase, or as a last resort statutory units may be purchased. - Please can the metric be amended, and a strategy outlined for how to achieve 10% net gain. - A baseline plan of the habitats present should also be provided.
