General Product Information	
Dimensions LxWxH	44x75x65 cm
Age group	3+
Play capacity (users)	1
Colour options	 

The Mule with its chunky, rocking body attracts toddlers for shorter or longer rides, again and again. Apart from its appealing shape, the Mule offers tactile variation with its steel hand hold, rubber foot support and smooth, wooden body. Tactile richness is a main motivator, especially in younger children. It supports their understanding of material characteristics such

as weight, smoothness, temperature and flexibility. This is important in for instance risk management. The spring ensures hours, years and decades of fun. The soothing, rocking movement of the Mule trains the sense of balance and the spatial aware-ness. These are crucial for body confidence, e.g. in avoiding falling. A good sense of balance is essential for

the ability to sit still and concentrate. So this is much more than a mere fun ride.

Mule

NRO101

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

Footsteps are made of high-quality stainless steel and equipped with moulded on PUR footrests. The PUR footrests are designed with groves to make the surface slip resistant.

KOMPAN Springs are made of high quality spring steel according to EN10270. The springs are cleaned by phosphating before they are painted with an epoxy primer and a polyester powder coating as top finish. The springs are fixed by unique anti pinch fittings for maximum safety and long lifetime.

Item no. NRO101-0401	
Installation Information	
Max. fall height	60 cm
Safety surfacing area	6.8 m²
Total installation time	2.1
Excavation volume	0.16 m³
Concrete volume	0.00 m³
Footing depth (standard)	41 cm
Shipment weight	51 kg
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
Robinia wood	15 years
Spare parts guaranteed	10 years
Springs	5 years
Stainless steel components	Lifetime

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

Triple Balance Beam

NRO804

Item no. NRO804-0601

General Product Information

Dimensions LxWxH	751x231x61 cm
Age group	3+
Play capacity (users)	6
Colour options	 

The Triple balance beam is a great playground classic, that attracts children again and again. It can function as playground glue, connecting activities. It can also function as a point for a break, providing seating for children sharing, or parents or carers in need of a point from which to observe play. When children balance across the Single Balance Beam, they train their

equilibrium immensely. The sense of balance is a fundamental motor skill, that is basic for the development of all other skills. The sense of balance for instance makes it possible for children to sit still and concentrate. So the fun of physical play supports child development. The spaciousness allows for ample social interaction and cooperative play.

Triple Balance Beam

Carousel with Seats

NRO120

The Carousel with Seats is an attractive playground classic for children and adults alike. With its two seats and spinning option it invites social play and thrill, a winning combination for all play. Children can't get enough of that. The spinning starts by pushing or pulling the carousel into motion from the outside. The circular shape makes room for users both

seated and standing, jumping on and off. Spinning on the carousel trains the vestibular system and the whole sense of balance. This is fundamental for the child's ability to navigate the world securely. It's fundamental for walking, running and being able to sit still and concentrate. When the sense of balance is under-developed, children can focus on

nothing but keeping equilibrium, seated or standing. So the fun of stomach tickling spinning serves a true purpose.

Item no. NRO120-0901

Posts and boards are made of pine wood from sustainable European sources. The wood is pressure impregnated Class 3 with Tanalith E3475 according to EN335 (Equivalent to NTR Class AB). On request it can be supplied as FSC® Certified (FSC® C004450).

The steel surfaces are hot dip galvanized inside and outside with lead free zinc. The galvanization has excellent corrosion resistance in outside environments and requires low maintenance.

Corocord ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand. PES has high strength with excellent resistance to abrasion and UV radiation. The rope loops are assembled by aluminum connectors.

The post end caps are made of injection molded high quality nylon (PA6). PA6 has good wearing and impact strength and is UV stabilized. The end caps protect vertical placed posts to ensure long lifetime.

The round climbing steps are made of PUR materials which is soft and durable.

Playhouse with Roof

NRO401

Item no. NRO401-0601	
General Product Information	
Dimensions LxWxH	151x168x260 cm
Age group	6m+
Play capacity (users)	4
Colour options	 

This adorable play house with its triangular shape will attract children again and again. With its welcoming triangular shape, the Playhouse with Roof adds a shelter-feel to the playhouse and suggests a wealth of themed play worlds: den, ship, house. This invites continued dramatic play scenarios. The Play House with roof welcomes smaller and bigger

groups of children in dramatic play. Dramatic play trains children's imagination and feeling of control. Additionally, children play out everyday scenarios that they have a hard time understanding, thus playing out their life observations. While doing so, they constantly talk and communicate with their peers, and even with themselves. This hugely stimulates

language skills as well as negotiation and communication skills.

Playhouse with Roof

NRO401

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The product/activities are preassembled from the factory to ensure all safety requirements are considered.

Two Towers with Overhead Handholds

NRO2001

Item no. NRO2001-1001

General Product Information

Dimensions LxWxH	772x614x360 cm
Age group	4+
Play capacity (users)	19
Colour options	 

The Tarzan challenge of the Two Towers with Overhead Handholds attracts children to try out their skills and strength. The inclined and twisted climbing nets train important motor skills such as cross coordination and balance. The overhead handholds are great trainers of upper body strength. The balance ropes train the balance as well as the posture control. The

slide and fireman's pole offer graded play challenges each with their stomach tickling reward and training of spatial awareness and core, leg and arm muscles. The variety of motor challenges adds to the fun of fundamental training: the mastery of spatial awareness, a skill important for instance in crossing the road safely. The transparency of

the structure makes possible communication and social interaction.

Two Towers with Overhead Handholds

NRO2001

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The paint used for coloured components is water based environmental friendly with excellent UV resistance. The paint is in compliance with EN 71 Part 3.

The Robinia products are designed with a KOMPAN colour concept with a number of different standard colours. The wood can also be supplied as untreated or with brown painted with a pigment that maintains the wood colour.

The product/activities are preassembled from the factory to ensure all safety requirements are considered.

The hardware is made of stainless steel or galvanised steel to ensure durable connections with a high corrosion resistance.

Two Seat Swing

NRO904

Item no. NRO904-1101

General Product Information

Dimensions LxWxH	319x208x284 cm
Age group	2+
Play capacity (users)	2
Colour options	 

Of all the play activities swinging is a favourite, children love it, as it can be done individually or together. This swing set supports the joy of doing the same thing at the same time, featuring two similar swing seats. The seats are shaped with a slight curve in the middle, to facilitate the secure seat position of a wide age span. A great place to play, for all ages, for

hours and days. Swinging trains the children's ABC: agility, balance and coordination as well as their spatial awareness. These motor skills are crucial to being able to judge distances and navigate, traffic safely. Children can stand, sit or lie on swings – as well as jumping off! Apart from the motor skills training, this trains the arm, leg and core muscles. The jumping off

builds bone density – the majority of which is built up during the first years of life.

Data is subject to change without prior notice.

Two Seat Swing

NRO904

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The standard seats of KOMPAN swings is engineered for maximum safety and durability. The two component seat with a PP inner core and outside rubber is produced in one operation. The seats are available with swing chains of either hot dip galvanised steel or stainless steel for all swings heights.

Swing hangers for Robinia wood crossbeams are made of stainless steel brackets and can move over two axis. The flange bearings are silicone enriched to make the suspension maintenance free.
