

Abstract Biology and ecology are the two main fields of research in environmental science. However, the two fields have not been integrated in a systematic way. This paper presents a framework for the integration of biology and ecology. The framework is based on the concept of the 'ecological niche' and the 'biological niche'. The framework is applied to the study of the ecology of the red fox (*Vulpes vulpes*) in the Netherlands. The results show that the framework is a useful tool for the integration of biology and ecology.

Task 10
To be argued: between the short- and the long-term

Lighting
Provide adequate lighting during installation. Spray, conductive paint and all accessories (spray, applicator, nozzle or electrode or other device for installing the conductive spray) are best kept during a minimum of three (3) hours at 100 percent relative humidity and a minimum of 60 percent dry bulb temperature.

Application
Apply the conductive spray to the conductive interconnect. Then, remove the conductive interconnect from the spray gun.

Final treatment
Spraying should occur within 10 minutes of the end of electrical device test.

Storage
Store spray gun and conductive spray for 1 year. Store the spray gun and the spraying equipment in a dry, clean, cool, and well-ventilated area.

whether women have different rates of depression and anxiety than men. In a 1996 study, researchers found that women are more likely than men to experience depression and anxiety disorders. However, the researchers also found that women are more likely than men to experience depression and anxiety disorders that are related to physical health problems. This suggests that the relationship between physical health and mental health may be different for women and men.

developing a business plan for the company's future. The business plan is a document that outlines the company's goals, objectives, and strategies for achieving them. It is a critical tool for management, as it provides a clear roadmap for the company's future. The business plan should be updated regularly to reflect changes in the market and the company's needs.
