

GENERAL PLANTING NOTES

Scope

- These notes apply to all soft landscape works shown on the Planting Plan, including new trees (13 no.), new native hedge (96 m), shrub planting, turf areas and meadow seeding (British Flora BFS8).
- All planting quantities, locations and extents are as shown on the approved planting drawing and associated schedule/annotations.
- 2. Standards and workmanship**
- All works to comply with BS 8545 (Trees: from nursery to independence) and BS 4428 (General landscape operations).
 - Plant supply to be UK grown where practicable, healthy, well rooted, true to name and size, and free from pests and diseases.
 - Any proposed substitutions must be agreed in writing by the Landscape Architect prior to ordering or planting.
- 3. Pre-planting checks and setting out**
- Contractor to verify all dimensions on site. Do not scale from drawings.
 - Set out all planting to avoid underground services, drainage runs, foundations, visibility splays and access requirements.
 - Protect and retain existing hedges and trees shown for retention. Do not encroach into fenced tree protection areas/RPAs.
- 4. Soil handling, preparation and drainage**
- Protect topsoil and subsoil from compaction. No trafficking or storage on planting areas.
 - Cultivate shrub and seeding areas to a friable tilth and remove rubble, contaminants and perennial weeds.
 - Where soils are heavy or seasonally wet, decompact and improve structure by incorporating organic matter. Ensure planting pits do not become sumps; use local drainage measures where required.
 - Do not import high-fertility topsoil into meadow areas; keep fertility low to support wildflowers.
- 5. Trees (13 no.) - planting and aftercare**
- Tree pits to be sized to suit stock, with loosened sides and base. Plant at original nursery soil level; do not bury the root flare.
 - Provide staking, ties, protection and mulch in accordance with the tree planting detail on the drawing.
 - Water thoroughly at planting and maintain watering during the establishment period, particularly in dry spells.
- 6. Native hedge (96 m)**
- Hedge to be planted as a double staggered row at 0.5 m centres with rows 0.45 m apart (or as stated on the drawing).
 - Plants to be evenly distributed/mixed to form a continuous hedge line; firm in and water in on completion.
 - Provide a continuous mulch strip to reduce weeds and protect from mower/trimmer damage; keep mulch clear of stems.
- 7. Shrub and mixed planting areas**
- Shrub beds to be cultivated, weed free and planted into moist (not waterlogged) ground.
 - Space plants as shown on the planting schedule; set out to avoid crowding and allow maintenance access.
 - Apply mulch after planting to suppress weeds and retain soil moisture. Maintain a mulch-free collar around stems.
- 8. Labiate mix pockets**
- Labiate mix (e.g., lavender, nepeta, rosemary, salvia) to be planted into free-draining pockets; locally amend with grit/sharp sand where necessary to avoid winter waterlogging.
 - Do not over-fertilise. Water to establish then avoid prolonged wet feet where possible.
- 9. Turf and amenity grass**
- Prepare topsoil to a fine tilth, firm and level. Lay turf in a staggered pattern with tight joints and well consolidated.
 - Water immediately after laying and keep moist until rooted. Keep traffic off until fully established.
- 10. Meadow seeding (British Flora BFS8)**
- Meadow to be sown with British Flora BFS8 General Meadow Mix at 2-3 g/m² (or as stated on the drawing).
 - Seeded to be fine and firm. Avoid nutrient enrichment. Roll after sowing to ensure seed-to-soil contact.
 - First-year management: cut as required to control annual weeds, cutting to 50-75 mm and removing arisings.
 - Ongoing management: typically 1-2 cuts per year (spring/autumn as appropriate), always remove arisings to maintain low fertility and diversity.
- 11. Fencing and wildlife access (where indicated)**
- Plot boundary closeboard fencing to be installed as detailed; all timber pressure treated and all fixings galvanised.
 - Provide hedgehog access points as 130 x 130 mm openings at ground level where shown.
 - Provide a 50 mm gap below the base rail where indicated to allow free passage for insects and small animals.
- 12. Establishment, maintenance and defects**
- Provide a minimum 12-month establishment and defects period from Practical Completion (or longer if required by planning condition).
 - Replace any failed planting and make good seeding/turf failures in the next available planting season to achieve full specification.
 - Maintain all planted and seeded areas weed free. Water, mulch top-up, formative prune and adjust ties/stakes as required.
 - All maintenance operations to avoid damage to retained trees/hedges and protected areas.

BRITISH FLORA BFS8 GENERAL MEADOW MIX FOR OTHER NEUTRAL GRASSLAND AREAS

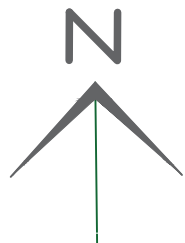

BFS8 contains 24 species of UK native wildflowers to provide a diverse, rich species of meadow mix. This generalist mix is highly adaptable and suitable for all types of soil and site conditions. The mix boasts a wide range of colours, from pinks and purples to yellows and whites. This naturally attracts a diverse array of wildlife from butterflies and beetles to grasshoppers and bees.

Sowing Rate: 2-3g/m²

This mixture contains the following species:

Wildflower	%
Achillea millefolium – (Yarrow)	0.5
Antennaria officinalis – (Botany)	0.5
Centaurea nigra – (Common Knapweed)	1.5
Centaurea scabiosa – (Greater Knapweed)	0.8
Daucus carota – (Wild Carrot)	0.7
Filipendula ulmaria – (Meadowsweet)	0.4
Gallium verum – (Lady's Bedstraw)	1.4
Knutia arvensis – (Field Scabious)	1.3
Leontodon autumnalis – (Autumn Hawkbit)	0.2
Leucanthemum vulgare – (Oxeye Daisy)	0.8
Lotus corniculatus – (Bird's-foot Trefoil)	0.5
Mula moschata – (Musk Mallow)	0.5
Medicago lupulina – (Black Medick)	0.5
Prunella lanceolata – (Ribwort Plantain)	1.1
Primula veris – (Cowslip)	0.4
Prunella vulgaris – (Selfheal)	1.3
Ranunculus acris – (Meadow Buttercup)	1.2
Rhinanthus minor – (Yellow Rattle)	2
Sanguisorba minor – (Salad Burnet)	1.3
Silene alba – (White Campion)	1
Silene flos-cuculi – (Ragged Robin)	0.3
Silene vulgaris – (Bladder Campion)	0.4
Trifolium pratense – (Red Clover)	0.4
Vicia sativa – (Common Vetch)	1.1
TOTAL	20
Grasses	%
Agrostis capillaris – (Common Bent)	4
Cynosurus cristatus – (Crested Dogtail)	12
Festuca rubra ssp. commutata – (Chewings Fescue)	12
Festuca rubra ssp. litoralis – (Slender Fescue)	12
Festuca ovina – (Sheeps Fescue)	24
TOTAL	80
