LANDSCAPING AND PARKING PROVISION

PROPOSED HAYBARN AND RETENTION OF LOCK-UPS

LAND AT WEST END, BARTON IN THE BEANS

I confirm that the proposal described above and in the accompanying documents forming part of this application for planning permission, does not warrant a landscaping or parking layout in this instance.

Due to the rural location, with established hedgerows, grassy meadows and tree lined boundaries it is our view that the existing landscape is sufficient and already in context. Additional planting would not enhance or improve the setting of this proposal.

As sole owner and user of this agricultural holding, vehicle parking requirements and access are limited to ourselves, family and contractors at harvest time, I therefore consider the provision of formal parking in designated areas as inappropriate in this instance.
