

RSPB Sparrow terrace nest box

- Three nest boxes in one terrace
- Designed specifically for Sparrows
- 32mm entrance holes
- Made from FSC® certified pine wood
- Made in the UK

Product description

Designed specifically for Sparrows to nest in, this terrace nest box provides three separate nest boxes in one timber terrace, each with its own 32mm entrance hole. Beautifully made in the UK.

Sparrows prefer their houses be placed under eaves 4-5m high, facing between north-east and south-east. Installing the boxes high up helps protect House Sparrows from predators and shields them from the elements. The high placement also offers a clear flight path for the birds to enter and exit the box.

The terrace nest box is made from FSC®-certified pine wood which contains a high proportion of natural resins, which help to protect the wood.

- Measures 48cm x 23cm x 17cm

RSPB nest boxes provide a safe and snug place for birds to roost and nest. Unlike cheaper alternatives, our [bird houses](#) are made from FSC®-certified timber and have excellent insulation properties. This makes them warm in winter and cool in summer.

RSPB nest boxes are carefully designed with correct dimensions and ventilation, without perches for intruders to grip onto and threaten the occupants.

Which size nestbox hole for which bird?

25mm - Blue Tit, Coal Tit, Marsh Tit

32mm - Great tit, Tree Sparrow, Pied Flycatcher, House Sparrow, Nuthatch, Lesser Spotted Woodpecker. 32mm entry holes can, if you wish, be reduced to 25mm using a nest box plate (R0110).

Cleaning

The box has two screws, each level with the entrance holes on the side panels of the box. Once loosened, the front panel of the box pivots open to allow access to all three chambers. Only do this for maintenance after the breeding season has finished.

RSPB nest boxes are made with thick timber and will survive for many years, even without the use of preservatives.
