1 Introduction

1.1 Introduction

This Travel Plan (TP) has been provided for the full planning permission for the development of a 72-bed care home with associated caring facilities and car parking at the former leisure centre, Coventry Road, Hinckley, Leicestershire, LE10 0JR. The proposals change the development schedule of the permitted development for 66 apartments and 7 houses with associated works (Reference 18/01237/FUL).

1.2 This TP relates to the 72-bed care home only. It is considered that the Travel Plan within Reference 18/01237/FUL, is for the residential aspect of the wider development site.

1.3 This TP has therefore been produced in accordance with paragraph 113 of the National Planning Policy Framework (2023) as well as guidance produced within 'Travel Plans, Transport Assessments and Statements' Ministry of Housing, Communities & Local Government (MHCLG, 2014); and local policies Core Strategy DPD (Hinckley & Bosworth Borough Council, 2009), Site Allocations and Development Management Policies DPD (Hinckley & Bosworth Borough Council, 2016); and regional planning policies Leicestershire Highway Design Guide (Leicestershire County Council, 2024).

1.4 The proposed development will comprise a 72-bed care home with a car park containing 21 spaces, including 3 spaces demarked as accessible, 3 spaces for electric vehicle charging and an extra ambulance vehicle space. A cycle storage facility is proposed, with changing rooms, lockers and showers proposed for staff.

1.5 This document provides a package of measures to assist in managing the transport needs of the care home. A successful travel plan will offer all staff and visitors a choice of travel modes to and from the site and encourage more sustainable patterns of movement.

1.6 What is a Travel Plan?

A Travel Plan is a long-term and dynamic management strategy for an occupier of a site that is designed to deliver sustainable transport objectives through positive action and is articulated in a document that is regularly reviewed. Travel Plans should be a site-specific document to be used to identify opportunities to implement sustainable travel initiatives at the early stages of development, such as including cycle storage or allocated spaces for car sharers. As such a Travel Plan is now considered an essential part of transport policy to increase transport sustainability for new developments.

1.7 Travel Plans aim to help reduce the impact of transport on the local environment and increase the awareness of sustainable travel access. A robust travel plan will reduce the amount of new car traffic generated by the development, reducing the pressure on surrounding roads.

- 1.8 All businesses, organisations and residential developments are encouraged to make informed travel choices on how they get about to help reduce: travel-to-work and parking congestion, business journey costs and carbon footprints through developing travel plans. This can be achieved through setting site specific targets to achieve a modal shift to reduce dependency on the car (particularly for journeys under 5km by single occupancy users).
- 1.9 Targets are supported by implementing measures to encourage and monitor an increase of travel choice to the site, through promoting and marketing initiatives for car share, bus travel, walking, cycling, working from home, adopting flexi working etc to all users of the site.
- 1.10 The travel plan should discourage irresponsible on and off-site parking for all users of a site through adopting a strategy to manage parking and limit inconvenience to other road users.
- 1.11 The travel plan should be monitored for a set period of time to assess whether the targets set are actually being met.
- 1.12 As such, the Travel Plan is structured as follows:
- Policy Summary
 - Travel Plan Objectives and Audience
 - Background to the Development
 - Management of the Travel Plan
 - Site Assessment
 - Targets, SMART and Modal Share
 - Measures
 - Monitoring and Evaluation
 - Remedial Actions/ Fallback Measures

2 Policy Summary

This section sets out the national and local policies that have informed the production of this Travel Plan.

2.1 National, Regional and Local Policy

There are transport objectives that extend through national, regional and local strategies and policies for planning and transportation, including National Planning Policy Framework (DLUHC, 2023). Local Policy is set out in Core Strategy DPD (Hinckley & Bosworth Borough Council, 2009), Site Allocations and Development Management Policies DPD (Hinckley & Bosworth Borough Council, 2016).

2.2 National Policy

National Planning Policy Framework (DLUHC, 2023)

The revised *National Planning Policy Framework*, published in July 2023, replaces the previous 2021 NPPF by the Ministry of Housing, Communities and Local Government, which in turn replaced *Planning Policy Guidance 13: Transport* and continues to focus on reducing development impact, including the following requirements:

104. Transport issues should be considered from the earliest stages of plan-making and development proposals, so that:

- a) the potential impacts of development on transport networks can be addressed;*
- b) opportunities from existing or proposed transport infrastructure, and changing transport technology and usage, are realised - for example in relation to the scale, location or density of development that can be accommodated;*
- c) opportunities to promote walking, cycling and public transport use are identified and pursued;*
- d) the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account - including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains; and*
- e) patterns of movement, streets, parking and other transport considerations are integral to the design of schemes, and contribute to making high quality places.*

110. In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that:

- a) appropriate opportunities to promote sustainable transport modes can be - or have been - taken up, given the type of development and its location;*
- b) safe and suitable access to the site can be achieved for all users;*
- c) the design of streets, parking areas, other transport elements and the content of associated standards reflects current national guidance, including the National Design Guide and the National Modal Design Code 46; and*
- d) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree.*

111. Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.

112. Within this context, applications for development should:

- a) give priority first to pedestrian and cycle movements, both within the scheme and with neighbouring areas; and second - so far as possible - to facilitating access to high quality public transport, with layouts that maximise the catchment area for bus or other public transport services, and appropriate facilities that encourage public transport use;*
- b) address the needs of people with disabilities and reduced mobility in relation to all modes of transport;*
- c) create places that are safe, secure and attractive - which minimise the scope for conflicts between pedestrians, cyclists and vehicles, avoid unnecessary street clutter, and respond to local character and design standards;*
- d) allow for the efficient delivery of goods, and access by service and emergency vehicles; and*
- e) be designed to enable charging of plug-in and other ultra-low emission vehicles in safe, accessible and convenient locations.*

113. All developments that will generate significant amounts of movement should be required to provide a travel plan, and the application should be supported by a transport statement or transport assessment so that the likely impacts of the proposal can be assessed.

2.3 Local Policy

Core Strategy DPD (Hinckley & Bosworth Borough Council, 2009)

The Core Strategy outlines the vision for development through spatial strategic objectives (Such as Spatial Objective 13: Transportation and Need to Travel) and policies to achieve sustainable development through accessibility and sustainable transport. The local plan highlights the challenges and opportunities, related to travel and transportation, facing the borough and has detailed ways to tackle the challenges as follows:

Policy 1 Development in Hinckley

Policy 1 outlines the approach and framework for the developments within Hinckley, by addressing important issues, transport impact and accessibility of sustainable modes of transport for all users. To promote sustainable forms of transport and mitigate the reliance on private motor vehicles, which will be achieved via the implementation and promotion of sustainable infrastructure where appropriate.

Policy 5 Transport Infrastructure

Policy 5 provides a detailed management approach to improving transport infrastructure within sub-regional centres. The council outlines that to support additional development, initiatives that contribute towards transport infrastructure is welcomed. Considering the development is a care home, it is unfeasible to reduce the need for travel, given the nature of the development. Therefore, reducing the reliance on private car, especially for short journeys, is targeted for the development to improve health for site users and mitigate the transport impacts of the development.

2.4 Development Management Policies DPD (Hinckley & Bosworth Borough Council, 2016)

The Development Management Policies DPD outlines the council's approach and target for sustainable travel. By addressing important issues relating to transport and community safety for users of new developments; to promote sustainable forms of transport and mitigate the reliance on private motor vehicles, which will be achieved via highway control and implementation.

DM17 Highways and Transportation

DM17 outlines the need for sustainable development through accessibility and sustainable transport. The benefits to site users and reasons for implementation of alternative forms of transport are outlined as follows:

- a) Seek to make the best use of existing public transport services and, where appropriate, provide opportunities for improving and sustaining the viability of those services;*
- b) Seek to ensure that there is convenient and safe access for walking and cycling to services and facilities;*
- c) Demonstrate that there is not a significant adverse impact upon highway safety; and in the case of development that generates significant movement;*
- d) That the development is located where the need to travel will be minimised and the use of sustainable transport modes can be maximised;*
- e) Where it can be demonstrated that the residual cumulative impacts of development on the transport network are not severe.*

2.5 Policy Summary

As outlined, national and local policies seek to support and promote sustainable development and the use of sustainable transport modes. Policy dictates that developments should pay particular attention to accessibility by walking, cycling and public transport as priority transport modes. The objectives included in these documents have been used to inform the objectives, targets and measures set out in this travel plan to make a positive contribution towards sustainable transport in the local community.

3 Travel Plan Objectives & Audience

The scope and objective of this travel plan is to provide a site-specific document which sets out incentives or disincentives for all site users of the proposed site to increase the use of sustainable modes of transport. It focuses on targets and measures for all staff and visitors of the proposed care home.

3.1 The 'audience' for the Travel Plan includes all members of staff and visitors, including able and disabled persons to the proposed care home development, who are identified and accounted for throughout the document; the measures and targets have been referenced to these audiences.

3.2 The main objectives of this travel plan include:

- Ensuring awareness of the Travel Plan for all site users
- Encouraging all staff and visitors to use sustainable modes of transport as opposed to travelling by single occupancy vehicle, i.e. walking, cycling or using public transport.
- Reducing privately owned cars
- Reducing the need to travel
- Promote the environmental, social and economic benefits of sustainable transport modes
- Reduce the impact of traffic on the surrounding highway network

3.3 Through achieving the above objectives, the following benefits will be gained:

- Reducing reliance on car travel
- Significant cost savings through cutting mileage and decreasing car park maintenance costs
- Improving its efficiencies and productivity by reducing travel time and the number of car journeys made by staff and visitors to and from the site
- Reducing noise and air pollution
- Improving access for all users to the site
- Increasing sustainable travel awareness for all users of the site
- Improve the health and well-being of site users
- Reducing parking and traffic congestion in the area
- Reducing road danger and protecting vulnerable road users
- Cutting carbon emissions and their contribution to climate change

4 Background to the Development

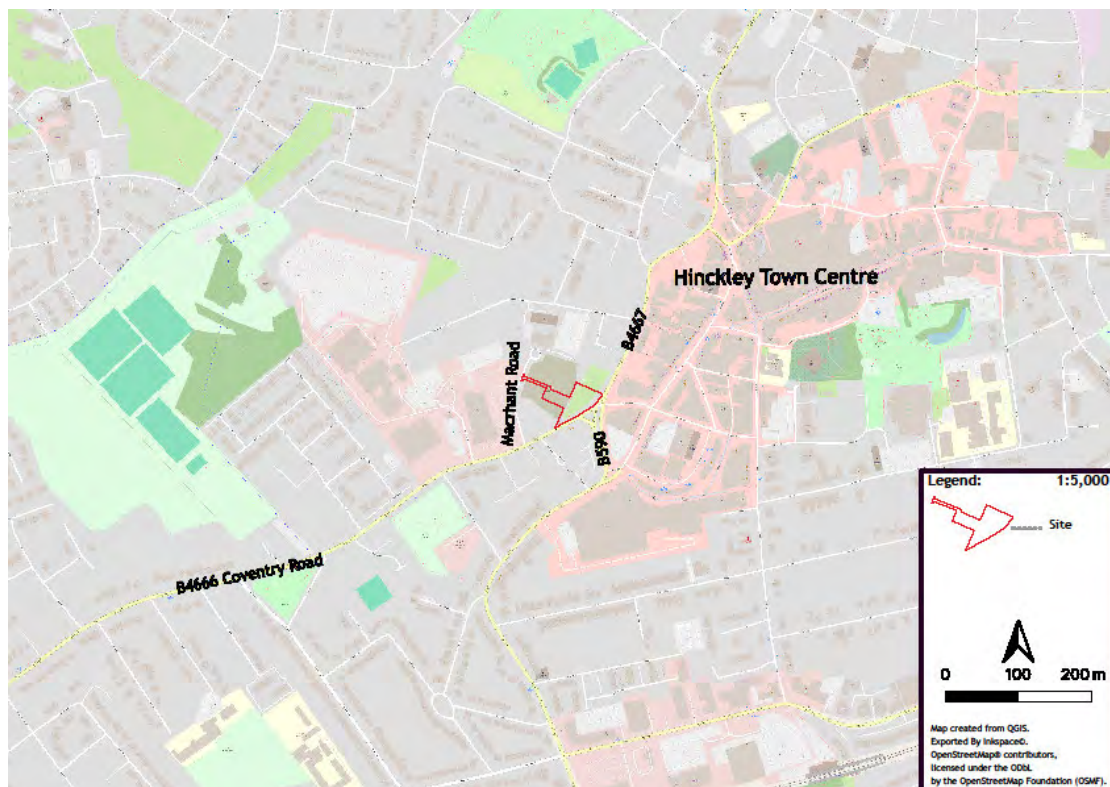

Site Location

The application site is situated on the edge of Hinckley town centre; the application site falls within the planning jurisdiction of Hinckley & Bosworth Borough Council and local highway authority of Leicestershire County Council. The site is well connected to the surrounding local and regional area, as Marchant Road directly links to B4666 Coventry Road, providing access to the wider urban area.

4.1 Existing Site

The application site, currently vacant, was formally a leisure centre; which currently has permission to develop 66 apartments (consisting of 2 blocks) and 7 houses with associated works (Reference 18/01237/FUL). The application site is bounded east of Marchant Road and north of Coventry Road. The predominant land use adjacent to the application site is residential and commercial. Figure 1 shows the local context surrounding the site.

Figure 1: A 1:5,000 map showing the features surrounding the site. Copyright and source information contained in appendix E.

4.2 Proposed Development

The development proposes a 72-bed care home with associated caring facilities and car parking. The proposed car park contains 21 car parking spaces, including 3 spaces demarked as accessible, 3 spaces available for electric charging and an extra ambulance space. The proposals change the development schedule of the permitted development for 66 apartments and 7 houses with associated works (Reference 18/01237/FUL).

- 4.3 To understand the difference in development schedule, an existing and proposed summary of the permitted scheme and the proposed development is outlined as per the following:

Permitted scheme - 18/01237/FUL:

Trinty House - 33 apartments/flats

- 33 ground floor unallocated car parking spaces

Hinckley Square - 33 apartments/flats

- 33 ground floor unallocated car parking spaces

4 three bed houses and 2 four bed houses (7 houses)

- 14 allocated car parking spaces

13 unallocated car parking spaces for residents

- Inclusive of 3 EV charging parking spaces

Total = 73 dwellings

Figure 2: Site plan for the permitted scheme, reference 18/01237/FUL. Courtesy of Green 4 Architects Limited. See Appendix G for scale, copyright and a detailed view of the permitted scheme.

4.4 New proposals:

Trinty House - 33 apartments/flats

- 33 ground floor unallocated car parking spaces

72-bed care home

- 21 car parking spaces, inclusive of 3 accessible parking spaces, 3 spaces for EV charging and an extra ambulance vehicle space.

4 three bed houses and 2 four bed houses (7 houses)

- 14 allocated car parking spaces

13 unallocated car parking spaces for residents

- Inclusive of 3 EV charging parking spaces

Total = 40 dwellings and a 72-bed care home

Figure 3: Proposed Site Plan. Courtesy of Green 4 Architects Limited. See appendix D for scale, copyright and a detailed view of the proposed site.

4.5 Staff numbers and operating hours

Data from operator was utilised to inform the likely staffing levels of the development.

- 4.6 Data from the operator outlines that with their experience maintaining and managing care/nursing homes, that the fill up rate to reach maximum occupancy is usually 3 years. However, to provide a 100% occupancy baseline, the operator has provided the following:

Shift Patterns:

Three shifts over 7 days, handover is only for the Senior's and is 15 minutes

9am - 5pm

8am - 8pm

8pm - 8am

Staff numbers (Assuming maturity):

9am - 5pm: 5 staff members

- Manager, Care Manager, Front of House, Maintenance Manager, Lifestyles Manager

8am - 8pm: 23 staff members

- Chef, Kitchen Assistant, Laundry x 2, Housekeeping x 3, 16 x Care Team Members

8pm - 8am: 10 staff members

- 10 Care Team Members

- 4.7 As a worst-case scenario, there could be a total of 28 staff members on-site during any given time.

4.8 Site access (Vehicles)

The existing access road to the site will be utilised to access the care home development via Marchant Road. No changes to local highway network or the permitted road layout is proposed.

- 4.9 The site access road forms a junction with Marchant Road, which then provides access to the site car park and the site proper.

4.10 Site access (Pedestrian/Cyclist)

Pedestrian access for the site is via the footways on Marchant Road; there are controlled and uncontrolled pedestrian crossings within 500m of the site access point, on B4666 Coventry

Road. Cyclists access to the site is via Marchant Road. The local highway network within 500m site access junction contains designated cycle lanes on B4666 Coventry Road.

4.11 Car Parking Standards

Site Allocations and Development Management Policies DPD (Hinckley & Bosworth Borough Council, 2016) policy DM18 Vehicle parking standards state that maximum car parking standards are outlined within the 6Cs Design Guide. However, the 6Cs Design Guide has been superseded by the Leicestershire Highway Design Guide (Leicestershire County Council, 2024), which is utilised for this assessment.

- 4.12 Table 1 outlines the requirement for car parking spaces, in compliance with Leicestershire Highway Design Guide (Leicestershire County Council, 2024), which highlight car parking standards as minimum:

Table 1: Class C2 Residential Institutions - Residential Homes for Elderly Car Parking Standards.

Land Use - Classification	Minimum number of car parking spaces
C2 Residential Institutions - Residential Homes for Elderly	<p>1 per four bedrooms plus 1 per staff member</p> <p>At least 1 ambulance space and 1 minibus space</p> <p>Available space off-highway for servicing / delivery vehicles</p>

- 4.13 As the development proposes a 72-bed care home with 28 members of staff at any given time, 46 car parking spaces would be required, according to the classification set out in Table 6 above.

4.14 Car Parking Provision

The development proposes 21 car parking spaces, with 3 spaces demarked as accessible, 3 spaces for electric vehicles and an extra ambulance space. Therefore, the proposals do not meet the minimum required standards. As discussed in Section 6, due to the numerous bus services within 400m / acceptable walking distance of the site, the location of bus stops, cumulative frequency and timings of bus services and the suitable provision of pedestrian infrastructure to and from the site providing safe walking routes, public bus travel to and from the application site is considered excellent, proposing a valid alternative for single occupancy private transport. Considering the locality of the site being on the edge of Hinckley town centre and with excellent pedestrian infrastructure and suitable cycling infrastructure on the local highway network, the minimum car parking standard could be further reduced in this context.

- 4.15 As discussed in Section 6, there are several public car parks, such as Trinity Vicarage Road, Trinty Lane East and Trinty Lane West, which could be utilised by visitors to the proposed care home development. This could mitigate indiscriminate on-street parking if the development site (72-bed care home) car park is at capacity.

4.16 Accessible Parking Spaces

Leicestershire Highway Design Guide (Leicestershire County Council, 2024) also provide guidance on the minimum required number of accessible parking spaces stating the following:

‘Accessible parking can be considered a reasonable adjustment according to the Equality Act. Therefore, wherever feasible, this must be provided for any disabled employee who needs it. A minimum number of accessible bays for each disabled employee that drives to work plus 5% of total parking spaces should be provided. A further 4% should consist of enlarged standard spaces.’

- 4.17 However, at this stage, as the number of disabled employees is not known. Therefore, a minimum baseline of 5% of total car parking spaces is assessed. Based on this requirement, 1 accessible parking space should be provided, based on the 18 (Excluding accessible spaces) car parking spaces proposed.

- 4.18 The development proposes 3 accessible parking spaces, which meets the minimum standard.

4.19 Electric Vehicle Parking & Charging Points

Leicestershire Highway Design Guide (Leicestershire County Council, 2024) provides guidance on the electric vehicle parking and charging infrastructure for developments. Guidance notes that for any development that is not residential/dwellings/houses:

‘All new non-residential buildings with more than 10 parking spaces must have a minimum of one chargepoint and cable routes for one in five (20%) of the total number of spaces.’

- 4.20 Based on the number of proposed car parking spaces, a minimum of 1 charge point should be available for at the car park, with allocation for electric vehicles.

- 4.21 Currently the proposals provide 2 charge points (3 spaces) with 8 spaces allocated for future electric vehicle infrastructure, which meets the minimum standard.

4.22 Cycle Parking Standards

Additionally, Leicestershire Highway Design Guide (Leicestershire County Council, 2024) provides guidance on cycle parking for developments. This document does not provide specific guidance related to C2 - Residential Institution Residential Homes for Elderly; the

document outlines that developments not highlighted within the guidance will be assessed on a site-by-site basis.

4.23 Leicestershire Highway Design Guide (Leicestershire County Council, 2024) outline that where specific standards are not provided, developers can refer to Local Transport Note 1/20 (Department for Transport, 2020).

4.24 Local Transport Note 1/20 (Department for Transport, 2020) outlines that for sheltered/elderly housing/nursing homes:

- 0.05 short stay cycle space per residential unit
- 0.05 long stay cycle space per bedroom

4.25 Accounting for a 72-bed care home, a minimum of 4 short stay and 4 long stay cycle parking spaces should be provided.

4.26 **Cycle Parking Provision**

Therefore, a total of 8 cycle parking spaces should be proposed.

4.27 A cycle store within the site allocated for cycle parking is proposed.

4.28 **Disabled Accessibility**

As discussed in Section 6, the local highway network creates an accessible environment for vulnerable road users, including wheelchair users and the visually impaired, through provision of controlled pedestrian crossings (B4666 Coventry Road) with tactile paving and dropped kerbs to help facilitate the movement vulnerable road users. Footpaths are present within the development site to facilitate pedestrian movement from Coventry Road.

4.29 The development includes Lifts, which where possible, provides access to all floors, which is suitable for wheelchair users and people with mobility impairments, providing safe and inclusive access for all site users.

5 Management of the Travel Plan

5.1 Appointment of a Travel Plan Co-ordinator

The local authority expects this Travel Plan to provide a commitment to the appointment of a travel plan co-ordinator that will be responsible for the successful implementation of the travel plan. The organisation must supply to the Council the name of the appointed person/s. The candidate needs to be of sufficient seniority to undertake tasks associated with the post. The appointment need not be a new one but may be a case of extending the job profile of an existing employee (this will depend on the size of the organisation).

5.2 The role of the travel plan co-ordinator will be to manage the travel plan, liaise with the Council and provide monitoring information when agreed. The role includes tasks such as:

- Organising Travel Plan meetings with managers to discuss options to improve the environment sustainability of the development and to discuss the progress of TP objectives, and any new measures in Section 8 which can be implemented
- Promoting and encouraging the use of travel modes other than the car
- Organising the distribution of information via multiple mediums and ensuring that all relevant information including the travel packs (if applicable), poster, Travel information boards etc is provided and disseminated to all staff and visitors, which includes able and disabled persons, providing up-to-date information that is clearly displayed on said mediums accessible for all site users.
- Arrange and record surveys of travel patterns and cycling parking usage as required
- Arrange for either full or snapshot travel surveys to be undertaken with everyone on the site, at intervals agreed with the Council, usually annually or bi-annually
- If applicable, liaise with public transport operators and relevant council departments and arrange regular meetings with all interested parties
- Organise talks and inductions to educate new members of staff
- Provide annual Monitoring Reports to the local authority to convey the results of the travel pattern surveys and success or short comings of the Travel Plan

5.3 The Travel Plan Coordinator is best appointed before first occupation of the development. The contact details of the appointed Travel Plan Co-ordinator will be provided to the relevant local authority.

- 5.4 The contact details of the TPC have yet to be confirmed at this stage, which will be confirmed with the local authority once the role has been nominated:

Organisation: Tanglewood Care Homes

Name: TBC

Job Role: TBC

Email: TBC

- 5.5 The local authority will be notified when the contact details for the TPC have been confirmed.
- 5.6 The TPC has a critical role in ensuring the Travel Plan is implemented, managed, monitored, and reviewed over time. They will be responsible for continuing to improve and develop the TP in consultation with members of staff. The TPC will provide an established-on site point of contact for all site users requiring further information or for those with suggestions to improve the sustainable travel to the site.
- 5.7 The role of the TPC does not require full time involvement. It is suggested that the person most likely to fulfil the role is the person who will be present on site during the majority of the working day, as they will have the best understanding of the operation of the building and be best placed to provide immediate advice on travel issues as they will be on hand constantly.
- 5.8 Sufficient time will be made available for the TPC to fulfil their role, dedicating at least 1 day a month to work on the Travel Plan. The TPC will also need to dedicate time once a year to undertake a travel survey and analyse the results.

5.9 **Senior Management Support**

The appointment of a TPC does not detract from the property owner's responsibility to implement and maintain the Travel Plan as per the planning application decision notice and ultimately remains their responsibility, assisted by the TPC. The support of senior management is essential for the effectiveness of the Travel Plan.

- TPC to encourage to involve senior management to motivate and encourage employees to take up more active travel and promote the Travel Plan;
- Senior management to offer and advise on personalised journey planning to and from the site, communicating why sustainable and effective journey planning is important for sustainable/active travel;
- Be proactive with support and communicate with staff, discussing sustainable travel issues/opportunities and personalised sustainable travel issues/opportunities.

5.10 Financial Resources

The owner and managers of the site need to be committed to the budgetary requirements for delivering a successful Travel Plan including financial resources to ensure the TP is put in place prior to occupation of the property and its subsequent day-to-day management.

5.11 The costs of implementing the travel plan will be minimal. The cost will exclude the cost of employing the Travel Plan Coordinator as this will be a member of staff already employed by the site owner.

5.12 The costs will include implementing the measures set out in Section 8 and may include printing and material costs for example purchasing the travel plan notice board. There may be other costs for purchasing other items such as umbrellas, cycle repair kit, maps, etc.

5.13 Unless there is 'in-house' expertise, there may be additional expenditure for a website developer to create a Travel Plan section on company websites.

5.14 The choice may also be taken to employ the services of a Traffic & Transportation consultant to carry out the annual monitoring instead of in-house which would incur additional costs.

5.15 It is estimated, depending on the level of in-house involvement, the finance plan should allow approximately £250 to £500 annually to cover running costs of the Travel Plan, from the time of first occupation to a point five years after completion of the development.

5.16 Communications Strategy

The 'audience' of this document are all members of staff and visitors to the development site. It is important to have a strategy for communicating the travel plan to all site users. Marketing the travel plan will be carried out from the first occupation of the building.

5.17 There will also be a 'feedback' mechanism in place to ensure any issues with the implementation of the Travel Plan can be clearly identified by the TPC and corrective action taken if required. Staff will be able to make direct contact with the Travel Plan Co-ordinator via email or telephone at any time or in person by prior arrangement.

5.18 The hallmarks of successfully marketing a travel plan are lively presentation, persistence and a use of a variety of marketing tools and techniques. These include branding the travel plan and building brand recognition, promotional events, incentives, special offers and prizes. Maximum visibility can be achieved through electronic media, leaflets, posters, displays, give-away freebies or messages on pay slips. Social media can play an important role in promoting the Travel Plan, for example a Facebook page can be created for sharing transport information for staff, and visitors to ask questions. To allow this information to be accessible

to all site users, the information disseminated to all members of staff and visitors should be inclusive, which will be discussed later in this Section (5).

5.19 Generally making the audience aware of the facts and figures can have an influence on their enthusiasm to adopt a more sustainable approach to their travel habits. There are plenty of strong facts and figures readily available to support your case, for example:

- Walking can improve mental sharpness and mood through the release of endorphins
- Cycling is linked with a 45% lower risk of developing cancer.
- Half an hour of daily exercise, such as a walk or cycle ride to work, can halve your risk of heart disease
- One-quarter of all car journeys are less than 2 miles and over half are less than 5 miles

5.20 As a minimum, the communications strategy will include the following:

5.21 **Travel Plan Notice Board**

A notice board dedicated to sustainable travel information will be placed in a prominent location within the buildings' communal atriums, so it is visible to site all users, including able and disabled persons. The information on the notice board should be available in a format available for persons with visual and mobility impairments; for example, information on the notice board should account for people with colour blindness and wheelchair users, a booklet/handout should be available in all formats. Therefore, the notice board will be available in all formats, which is inclusive of site users with visual and mobility impairments. The notice boards will include up to date bus timetables, cycle & walking maps, future events and up to date traffic information, which will be used to communicate the message of promoting increased use of alternative modes of transport instead of the motorcar. Further information regarding the implementation of Travel Plan notice boards is discussed in section 8.

5.22 **Travel Information**

Travel information to be disseminated to all staff and visitors via the travel information board, websites/social media or if possible travel packs, which should be available in as many readable formats as possible for people with visual and mobility impairments i.e Colour Blind scheme. As per section 8, these information points should include:

- 1) Site specific travel and transport information, such as included within the following links:
 - Walking information
 - [Hinckley & Bosworth - Walking](#)
 - [Hinckley & Bosworth - More about walking](#)
 - Walking for fitness or pleasure
 - Let's Walk: regular walking opportunities in Hinckley and Bosworth
 - Walking maps for the Hinckley Area
 - [Leicestershire County Council - Walking for Health \(Hinckley and Bosworth areas\)](#)
 - <http://walkit.com/>
 - Cycling information
 - [Hinckley & Bosworth - Cycling in and around Hinckley](#)
 - [Hinckley & Bosworth - More about cycling](#)
 - Cycling for fitness, pleasure or transport
 - Cycle parking in Hinckley town centre
 - Cycling clubs in the borough
 - Hinckley Women's Breeze Cycling
 - <https://www.sustrans.org.uk/national-cycle-network/>
 - Bus and train timetables, maps and tickets
 - [Leicestershire County Council - Older person's bus pass](#)
 - [Leicestershire County Council - Apply for a disabled person's bus pass](#)
 - [Leicestershire County Council - Buses in my local area](#)
 - [Traveline Journey Planner](#)
- 2) Subsidy of season tickets and % off discount vouchers for use on bus or rail in the council for staff.
- 3) Details of relevant pedestrian, cycle and public transport routes to/ from and within the site. As included in Appendix A and Section 6 of this report, accompanied by a map showing the internal routes of the site.
- 4) Copies of relevant bus and rail timetables, such as included in Appendix A
- 5) Details of the appointment of the Travel Plan Coordinator, including name and contact details. Details of any meetings such as Steering Group, or any Travel Plan events.
- 6) An Action Plan promoting the measures that are to be implemented for sustainable access of the site, such as included in Section 8.

5.23 Website

A good place to display information about the travel plan is on a dedicated section on a website/ social media outlet. A pdf copy of the travel plan will be placed on the website/ social media, along with other useful information including links to other relevant websites and downloadable travel information such as timetables and route maps.

5.24 Promotional Events

A good way to maintain enthusiasm for following the requirements of the travel plan is to have regular events to promote sustainable travel. This could include producing a quarterly newsletter which promotes individual measures and initiatives and makes people aware of forthcoming events such as Walk to Work Week and Bike Week. Events can be created and publicised through social media outlets to increase awareness of the event.

5.25 Public Transport Routes and Timetables

The Travel Plan Coordinator must provide information on the public transport network within proximity of the site, which includes routes and timetables. This information can be distributed via a travel pack, through the travel plan notice board and/or through a website/social media. Measures to include public transport routes, timetables and travel vouchers within the travel plan are discussed in section 8. The information provided should be accessible to all site users and should be available in as many readable formats as possible for people with visual and mobility impairments i:e Colour Blind scheme.

5.26 Walking and Cycle Routes

Walking and cycle routes should be contained within the travel plan notice board and/or a travel pack. Information regarding walking and cycle routes is discussed in section 5 and section 6. Information should be inclusive of all formats, which should be available in as many readable formats as possible for people with visual and mobility impairments i:e Colour Blind scheme.

5.27 Bikeability

All site users should be notified of Bikeability schemes to improve and incentivise the use of bicycles to travel to and from the site. Details on Bikeability schemes are discussed in section 8.

5.28 Health and Wellbeing

The benefits of sustainable active travel such as walking and cycling, should be advertised to inform and encourage all site users to active travel. Additionally, to encourage active travel, the TPC should also promote events such as Bike Week, Catch the Bus Week, Car Free Day and Liftshare Week. Details on these events are discussed in section 8. Information should be inclusive of all formats, which should be available in as many readable formats as possible for people with visual and mobility impairments i:e Colour Blind scheme.

5.29 Travel surveys/audits

Within 3 months of occupation, a travel survey and audit should be undertaken to establish the trip generation and modal split. Items to evaluate should, at a minimum, should include:

- How site users currently travel to and from the site
- Staff shift patterns
- How many people live/work in the same postcode area (to assess the potential for car sharing)
- What facilities already exist on site or will be provided as part of the new development (e.g. showers, bike racks, lockers, motorcycle parking)
- What facilities are lacking/are needed to encourage more sustainable travel

An example of a travel survey is provided within Appendix B, which can be adapted to suit the development.

6 Site Assessment

6.1 Introduction

This section includes an audit of the existing transport modes that form a part of the Travel Plan process and is directly relevant to the Targets proposed in Section 7. Given the long shelf life of a travel plan this information should be regularly updated by the TPC.

6.2 Site Location and Surrounding Area

As illustrated in Figure 1 and Appendix E, the site is well connected to the surrounding local and regional area, as Marchant Road provides direct access to the A4666 Coventry Road, which directly links to Hinckley town centre and provides excellent access to the wider Hinckley area.

6.3 Local Highway Network

6.4 Marchant Road

Marchant Road runs north to south intersecting and forming a junction with B4666 Coventry Road to the south; currently Marchant Road is not a through road. Marchant Road bounds west of the site and forms a junction with the site access road; with the highway restricted to 30mph. Marchant Road contains footways and street lighting on both sides of the road, with dropped kerbs to facilitate the movement of pedestrians and vulnerable road users. Marchant Road does not contain uncontrolled or controlled pedestrian crossings to facilitate the movement of pedestrians, cyclists and vulnerable road users. The footways and carriageway are in adequate condition suitable for the movement of all road users.

Marchant Road does not contain signage, markings or cycling infrastructure to facilitate and indicate the movement of cyclists. Therefore, cyclists may have to utilise the highway carriageway for travel, which may conflict with other road users.

Marchant Road contains markings in the form double yellow lines and single yellow lines throughout the carriageway.

6.5 B4666 Coventry Road

B4666 Coventry Road runs southwest to northeast and is intersected by Marchant Road; B4666 Coventry Road intersects B4667 and B590 to the east forming an intersection. B4666 Coventry Road is subject to a 30mph speed limit; with speed cameras present to enforce the speed limit. B4666 Coventry Road contains footways and street lighting on both sides of the road, with dropped kerbs and tactile paving to facilitate the movement of pedestrians and vulnerable road users. B4666 Coventry Road contains controlled pedestrian crossings with

tactile paving, dropped kerbs and pedestrian refuge islands to further facilitate the movement of pedestrians, cyclists and vulnerable road users. The footways and carriageway are in good condition suitable for the movement of all road users. Signage is present to warn motorised road users of vulnerable road users.

B4666 Coventry Road contain cycleways in the form of shared use footways with signage, markings and cycling infrastructure to facilitate and indicate the movement of cyclists.

Travelling westbound from the intersection with the B4667 and B590, B4666 Coventry Road contains on-street parking restrictions in the form of double yellow lines until the junction with Brookdale.

6.6 Roads intersecting B4666 Coventry Road

There are several roads that intersect B4666 Coventry Road and provide access to the wider highway network; these roads are restricted to 30mph and contain footways with streetlighting present on both sides, with tactile paving and dropped kerbs at several junctions to facilitate the movement of pedestrians and vulnerable road users, such as on Short Way and Northfield Road. The footways and road pavements are generally suitable for the movement of all road users. These roads contain double yellow lines at several junctions with B4666 Coventry Road on both sides of the highway that restrict on-street parking, otherwise these roads do not contain any on-street parking restrictions.

These roads do not contain signage, markings or cycling infrastructure to facilitate and indicate the movement of cyclists. Therefore, cyclists may use the highway footway or carriageway for travel, which may conflict with other road users.

6.7 Public car park opportunities

As per the permitted scheme 18/01237/FUL, the Trinity Vicarage Road public car park will be retained but reduced to total 61 car parking spaces to allow highway access to the dwellings. This public car park could be utilised for visitors of the proposed care home development.

6.8 Additionally, Trintiy Lane West and Trinty Lane East public car parks are within convenient/acceptable walking distance of the site and could be utilised by visitors of the proposed care home development.

6.9 Sustainable Accessibility

An investigation into the provision of sustainable travel options for potential users of the application site has been carried out to assess the sustainable accessibility of the site. The following modes of transport have been investigated:

- Bus travel
- Rail travel
- Walking
- Cycling

6.10 Bus Travel

The Institute of Highways and Transportation Guidelines for Planning for Public Transport in New Developments (IHT, 2000a) states that the maximum walking distance to a bus stop should not exceed 400m if bus travel is to be maximised.

- 6.11 Using the IHT report as a guideline, the nearest bus stop to the site is located approximately 130m south of the site on B4666 Coventry Road, which is serviced by Stagecoach Bus 11 and 148 routes and Arriva Bus 158 route.
- 6.12 Another bus stop is located approximately 380m southeast of the site on Waterloo Road (Hinckley Bus Station), which is serviced by Stagecoach 148 routes and Arriva Bus 158, X6 routes. Further on Waterloo Road, approximately 510m southeast of the site, another bus stop is serviced by Arriva Bus 7, 7A, 8 and X6 routes.
- 6.13 While not within 400m, another bus stop is located 450m northeast of the site and is within acceptable walking distance. This bus stop is located on the Regent Street and is serviced by Arriva Bus 7, 7A and 8.

6.14 A summary of the frequency of the nearest services is detailed below:

Table 2: Bus services. See appendix A for route and timetable of the bus services outlined below.

Bus service	Closest Bus stop	Route	Weekday				Weekend	
			Frequency		Times		Frequency	
			On-peak	Off-peak	First	Last	Sat	Sun
11	130m, Coventry Road	Hollycroft Grange - Coventry Road - Hinckley	30 mins	30 mins	06:57	18:57	30 mins	-
148	130m, Coventry Road	Leicester - Earl Shilton - Hinckley - Nuneaton - Coventry	30 mins	45 mins	05:48	00:07	30 mins	1 hour
158	130m, Coventry Road	Leicester - Earl Shilton - Hinckley - Nuneaton	30 mins	45 mins	05:21	23:37	30 mins	1 hour
X6	380m, Waterloo Road	Leicester - Hinckley - Coventry	2 hours	3 hours	06:30	19:10	2 hours	-
7	450m, Regent Street	Burbage - Hinckley - Nuneaton	30 mins	1 hour	07:25	16:45	1 hour	-
7A	450m, Regent Street	Burbage - Hinckley - Nuneaton	50 mins	1 hour	08:00	18:20	-	-
8	450m, Regent Street	Lutterworth - Burbage - Hinckley	1 hour	1 hour	05:28	22:55	1 hour	8 hours

6.15 Utilising Planning for Public Transport in New Developments (IHT, 2000a) as a guideline, there are several bus stops within 400 metres of the site, offering a variety of routes with large catchment areas. Routes 11, 148, 158 and 7 offer relatively frequent on-peak services, accounting for these services holistically can provide a valid sustainable alternative to travel to and from the site. Accounting for all the services outlined within Table 2, the provision of

numerous bus services offers a cumulatively frequent public transport service, providing a valid alternative to single occupancy motorised travel.

- 6.16 Further information on bus routes can be found by visiting Leicestershire County Council's website:

[Leicestershire County Council - Buses in my local area](#)

There is an online service available on www.nextbuses.mobi, or the Next Buses app that provides information on the next buses for specific bus stops.

- 6.17 Due to the numerous bus services within 400m / acceptable walking distance of the site, the location of bus stops, cumulative frequency of bus services and the suitable provision of pedestrian infrastructure to and from the site providing safe walking routes, public bus travel to and from the application site is considered excellent. Therefore, it could be considered that the site has excellent access to public bus services.

6.18 Rail Travel

Hinckley station is located 0.5 miles south of the site or approximately a 13-minute walk, with network access via Coventry Road and Station Road.

- 6.19 Rail Services are operated by West Midlands Railway with 2 platforms. The ticket office is open Monday-Friday from 06:40 - 13:00 and on Saturdays from 06:40 - 13:00. Ticket machines are available outside these hours.

- 6.20 The station is designated as a Category B station, with some step-free access.

- 6.21 The customer car park contains 63 spaces, with 2 spaces demarked as accessible. In addition, 16 cycle lockers/stands are provided at the station, which are sheltered and monitored.

- 6.22 Services are frequent every hour, to destinations such as Leicester, Coventry and Birmingham.

- 6.23 Hinckley train station is approximately a 13-minute walk from the site, providing an important transport interchange for site users who require regional travel. Therefore, rail travel to and from the site can be viable.

6.24 Walking

A person's willingness to walk is dependent on many factors including access to a car, safety, road congestion, weather, gradients, parking, health, direction of route and purpose of journey.

- 6.25 National Planning Policy Framework (DLUHC, 2023) refers to the importance of encouraging walking as an alternative mode of travel which offers the greatest potential to replace short car trips, particularly under 2 km, (approximately 1.5 miles).
- 6.26 The Institution of Highways and Transportation publication guidelines for Providing for Journeys on Foot (IHT, 2000b); note that walking accounts for over 25% of all journeys and 80% of journeys up to 2km.
- 6.27 Figure 4 shows a 2 km walking isochrone map centred on the site. Figure 4 shows Hinckley, including the train and bus station, and the neighbouring urban areas are within acceptable cycling distance.

Figure 4: 2km Walking Isochrone map, with the proposed site at the centre. Map courtesy of: © OpenStreetMap | Created with TravelTime API | Places data provided by Foursquare.

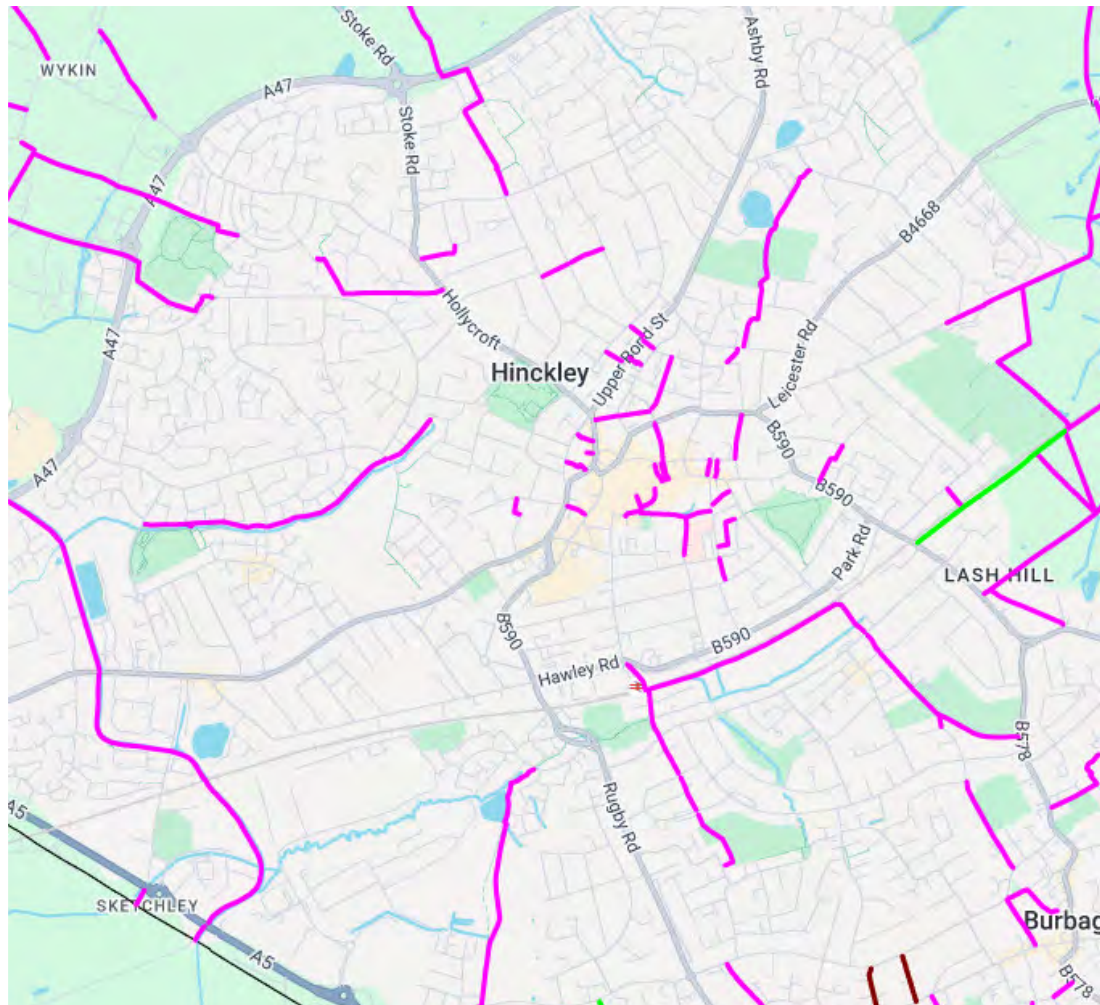

- 6.28 As discussed in sections 6.4 to 6.7, the local highway network within vicinity of the site contains numerous footways, streetlighting, dropped kerbs and tactile paving to facilitate the movement of pedestrians and vulnerable road users. Also, within the walking isochrone boundary, there are controlled pedestrian crossings with dropped kerbs, tactile paving and

pedestrian refuge islands to facilitate the movement of pedestrians, such as on B4666 Coventry Road. The local highway network creates an accessible and safe environment for pedestrians and is considered excellent.

- 6.29 Figure 5 shows the availability of the public rights of way within the vicinity of the site. Purple lines indicate a Footpath, green lines indicate a Bridleway and brown lines a Byway.

Figure 5: Public rights of way map centred on the site. Map extracted from Leicestershire County Council, © Map data 2025 Google.

- 6.30 The proximity of numerous public rights of way paths can provide site users the opportunity to access the site safely, as these routes can form part of a journey and are contained within the suburban area of Hinckley, which provides safe, designated walking routes throughout Hinckley and the wider urban area.
- 6.31 Given the proximity of the site to the public rights of way paths, walking is considered to be viable to access the site. Additionally, due to the safe environment created by the pedestrian facilities on the local highway network to and from the site is considered to have excellent viability, as the highway environment creates a safe environment for pedestrians.

- 6.32 Walking maps/routes within Hinckley are also available online by visiting the following websites:

[Hinckley & Bosworth - Walking](#)

[Hinckley & Bosworth - More about walking](#)

[Leicestershire County Council - Walking for Health \(Hinckley and Bosworth areas\)](#)

6.33 **Cycling**

National Planning Policy Framework (DLUHC, 2023) refers to the importance of encouraging cycling as an alternative mode of travel, which has the potential to be a substitute for short car trips, particularly those under 5km and to form part of a longer journey by public transport.

- 6.34 As highlighted in sections 6.4 to 6.7, the local highway network contains cycling infrastructure, particularly on B4666 Coventry Road, to facilitate the movement of cyclists.
- 6.35 The location of the site provides a wide catchment area as shown in Figure 6. Hinckley, including the train and bus station, and the neighbouring urban areas are within acceptable cycling distance.

Figure 6: 5km Cycling Isochrone map, with the proposed site at the centre. Map courtesy of: © OpenStreetMap | Created with TravelTime API | Places data provided by Foursquare.

6.36 Appendix A shows the availability of the designated cycle routes within Hinckley. The cycle routes map shown highlights the availability of on-road and off-road cycle routes within proximity of the site; there are dedicated cycle routes cycling distance of the site and are contained within the cycling isochrone boundary; these designated cycle routes can provide site users the opportunity to access the site safely. While these routes directly intersect or are connected to the main roads running to and from Hinckley, providing access to the surrounding urban areas.

6.37 [Sustrans](#) also provides information such as cycling for beginners, winter cycling and cycling in the dark on the Get Active webpage.

6.38 For more information, please visit the following web pages:

[Hinckley & Bosworth - Cycling in and around Hinckley](#)

[Hinckley & Bosworth - More about cycling](#)

<https://www.sustrans.org.uk/national-cycle-network/>

- 6.39 For those planning a bike ride, the [Cycle Streets](#) website and app provide the latest route information and are designed to encourage people to take up cycling as an alternative to using their cars.
- 6.40 The location of designated cycle routes provides site users with an opportunity to access the site safely, which could encourage more site users to cycle. With the B4666 Coventry Road containing sufficient cycling infrastructure to support the safe movement of cyclists. Therefore, the existing road network is considered to be adequate for users of the site to cycle on approach to the development, the provision of designated cycle routes within acceptable cycling distance of the site could also provide viable alternative means of travel on approach to the development.

6.41 Local Amenities

The site has variable access to the local amenities within proximity of the site and the wider urban area, which has been summarised in Table 3 below:

Table 3: Distance to local amenities

Amenity	Location	Distance	Walking Time *
Nearest Eatery - Steamin Billy Brewing Co	Coventry Road	130 m	2 mins
Nearest School - St Marys Primary School	Church Walk	650 m	9 mins
Nearest Post Office - Hurlford Post Office	Church Walk	700 m	9 mins
Nearest Medical Centre - Hinckley and District Hospital	Mount Road	950 m	13 mins
Nearest Convenience store - Express mini market	Rugby Road	350 m	5 mins
Nearest Place of Worship - Holy Trinity Church	Trinity Vicarage Road	150 m	2 mins
Nearest Pharmacy - Boots Pharmacy	Britannia Shopping Centre	680 m	9 mins
Nearest Open Space - Granville Road Park	Coventry Road / Granville Road	400 m	6 mins

* Walking times based on "leisurely" 5km/hr (3mph)

- 6.42 The location of these amenities/services are within acceptable walking distance of the site. Therefore, given the distance of the highlighted amenities and the provision of pedestrian/cycling infrastructure on the local highway network, it is likely that users of the site would access these amenities via sustainable modes of transport.
- 6.43 **Sustainable Accessibility conclusion**

The location of the site provides good accessibility by sustainable modes.

- 6.44 There are several bus stops within 400m / acceptable walking distance, which are serviced by numerous services. As outlined in Table 2, all the bus services highlighted provide a large catchment area, with services providing a cumulative frequent service. Bus travel to and from the site is considered excellent and a viable option to replace private motorised travel.
- 6.45 Walking is a valid alternative option for site users, with footways on the local highway network being well-lit, in good condition, suitable for vulnerable road users, with the local highway network containing dropped kerbs, tactile paving, pedestrian refuge islands and controlled pedestrian crossings on the local highway network to further facilitate the movement of pedestrians and vulnerable road users. Additionally, there are several public rights of way paths within the walking isochrone, providing safe and designated walking routes on approach to the site.
- 6.46 Hinckley train station is approximately 0.5 miles south of the site. Hinckley train station can serve as an important transport interchange for site users who require regional travel to and from the site regularly.
- 6.47 The provision of cycling infrastructure and facilities on the local highway network can create a safe environment for site users who cycle. Additionally, the provision of designated cycle routes within proximity of the site creates a safe and accessible environment for cyclists. Therefore, cycling provides a safe mode of transport to and from the site and is considered a valid alternative to motorised travel to and from the site.
- 6.48 The provision of walking, cycling and public transport infrastructure on the local highway network can provide a valid and safe alternative to private motorised travel

6.49 Predicted Travel Characteristics

To calculate the likely trips generated by the existing and proposed site, the TRICS (Trip Rate Information Computer System) database was investigated to establish data available from comparable sites to understand the likely trip generation. The data obtained was deemed suitable for this assessment. See Appendix F for the TRICS data (See Transport Assessment for full breakdown of trips and multi-modal share).

- 6.50 To further understand the likely movement of staff to and from the proposed site, data from the operator was utilised in relation to the number of staff and shift pattern, to determine the multi-modal trips per beginning/end of shift and handover period; TRICS data was utilised to derive the modal split of staff.
- 6.51 During the weekday, the TRICS data outlines that the proposals have the potential to generate 11 vehicle trips during the typical AM peak (08:00 - 09:00) and 9 vehicle trips during the typical PM peak (17:00 - 18:00).

- 6.52 Based on data outlined by the operator, the likely peak movement of vehicles to and from the site is during staff arrival/departure and handover periods, as staff both arrive and depart from the site. As staff numbers can be quantified at this stage, 8 am - 8 pm for day care staff (23 members) and 8 pm - 8 am for night care staff (10 members), accounting for TRICS modal split, this equates to 12 arrival trips and 5 departure trips during 07:00 - 08:00. Considering handover times, the arrival and departure times for care staff are unlikely to occur during the typical AM and PM peak hours.
- 6.53 Table 4 outlines the applied TRICS vehicle data and Table 5 outlines the potential multi-modal split based on TRICS data.

Table 4: Proposed weekday vehicle trip rates and trip generation

Time Period	Trip rates, calculation factor 1 resident			Vehicle trip generation (72 residents)		
	Arrivals	Departures	Total	Total Arrivals	Total Departures	Total Trips
AM peak 08:00-09:00	0.075	0.064	0.139	6	5	11
PM peak 17:00-18:00	0.044	0.069	0.113	4	5	9
Total 07:00-21:00	0.867	0.887	1.754	63	64	127

** Note the trip generation figures have been rounded up*

Table 5: Modal split of the proposed 72 bed care home

	Total vehicles	Total cycle	Total walk/pedestrian	Total public transport
TRICS trip generation	127	5	74	44
TRICS model split	51%	2%	30%	17%

- 6.54 Accounting for the management staff shift (5 members) 9 am - 5 pm and applying TRICS data, it is likely that management staff will generate 3 vehicle arrival trips and 3 vehicle departure trips from the proposed care home during the typical AM and PM peak hours.
- 6.55 TRICS data for care homes highlight that the peak movement of vehicles for care homes is between 10:00 - 11:00 and 15:00 - 16:00. Therefore, it is likely that the visitor arrival and departure trips are staggered throughout the day and over different periods, not concentrated during the typical AM and PM peak periods.
- 6.56 Therefore, on first occupation of the development and within 3 months, the operator should commit to conducting travel pattern surveys to establish the realistic modal split of the development.

6.57 Predicted Travel Characteristics - Summary

In summary, the majority of staff of the proposed care home are unlikely to travel to and from the site during the typical AM and PM peaks. However, it is noted that management staff will generate vehicle trips during the typical AM and PM peaks. Nonetheless, the majority of vehicle trips generated by the proposed site are unlikely to be concentrated at a particular time or period, as arrival and departure times for care staff, visitors, servicing and refuse collection of the care home are likely to be staggered throughout the day and over different periods. Nonetheless, to derive the realistic multi-modal split of the proposed care home, the operator should commit to conducting travel pattern surveys on first occupation of the development and within 3 months; then on a yearly basis thereafter.

7 Setting Targets

This section identifies how Travel Plans submitted in support of applications will be formulated in terms of Targets.

- 7.1 Targets are an essential part of a Travel Plan and with monitoring, targets can be checked and adjusted as necessary. Targets are in the form of trips during the peak periods i.e the shift arrival periods and the handover period. The setting of realistic targets may only be possible after a baseline survey has been undertaken following occupation of the development. As the existing site is vacant, there are no existing staff or visitors to include in a baseline survey, therefore a travel survey will take place within the first 3 months of occupation.
- 7.2 Targets should be measurable, achievable, realistic and time-related and should relate to the particular circumstances of the site. Targets can be 'aim' type (e.g. increase percentage using non-car modes) and/or 'action' type targets (e.g. appoint a Travel Plan Co-ordinator, interest free loans for public transport).
- 7.3 The targets have been set for visitors and staff to the site, and specifically relate to the objectives set out in Section 3.

7.4 Primary target;

The primary target of this Travel Plan is to reduce single occupancy car trips.

- 7.5 For this target to be achieved, it is imperative that a number of secondary targets are delivered:

Secondary Targets include;

- Appoint a Travel Plan Coordinator
- Travel Pattern Surveys undertaken within 3 months of occupation and annually thereafter
- Monitor cycle and car parking occupancy
- Numbers using public transport, walking and cycling
- Ensure that all staff and visitors are aware of the Travel Plan and its coordination, sustainable transport information, and are informed of the health, economic and environmental benefits of travel by non-car modes.

- 7.6 The targets of the Travel Plan are relevant to the baseline data and the specific issues and barriers to using sustainable travel to and from the site and follow the requirements of "SMART" i.e.:

- Specific - objectives specify what to achieve
- Measurable - we are able to measure if the objectives are met or not
- Achievable - the objectives set are achievable and attainable
- Realistic - the objectives can be realistically achieved with the resources we have
- Time - we have the time to achieve the set objectives

Table 6 - Smart targets

Target	Specific	Measurable	Achievable	Realistic	Time
A TPC is appointed	The TPC will be appointed prior to occupation of the development	Yes	Yes	Yes	Prior to occupation
Monitor cycle parking occupancy	If the cycle parking demand within the garage consistently exceeds 90%, measures should be considered to increase the capacity.	Monitoring will be carried out by the TPC	To be actioned by the TPC. If there is no exceedance, no action need be taken.	Yes, if provision needs to be increased then the TPC will discuss increasing provision with the developer	Ongoing - annual monitoring
Monitor the Car Park Demand and Capacity	If the curtilage and garage is consistently full, or there is evidence of overspill parking, or irresponsible drop-offs, then measures will need to be considered to either manage the parking or increase the provision.	Monitoring will be carried out by the TPC	To be actioned by the TPC, if there is an issue with overspill, the site owner may need to be consulted.	Yes, if exceedance occurs, the owner may need to increase parking provision with guidance from the TPC, or invest more money into sustainable measures (Section 8)	Ongoing - annual monitoring.
Numbers using public transport, walking and cycling	TPC to undertake travel pattern surveys of staff and visitors	Yes, within the travel pattern surveys.	TPC to action. All staff to be asked to complete the surveys to maximise data collection.	Yes	Within 3 months, then yearly (refer to section 9)
Full travel plan awareness to all staff, including transport information and benefit	The Travel Plan will be available to all staff/visitors via social media platforms/website, or a hard copy by request.	Yes, to be verified by the TPC, and reflected in the number of surveys that are completed.	TPC to ensure awareness via social media, displays within the entrance etc.	Yes	Ongoing.

7.7 Targets

In order to determine the overall effectiveness of the Travel Plan, information on modal share is also required.

- 7.8 At this stage, the actual breakdown of the modes of travel to the site are unknown until the initial Travel Pattern Survey has been undertaken. Data provided by the operator and the TRICS database was interrogated to provide an indication of what the modal trip generation is likely to be (See Transport Assessment for full breakdown of trips and multi-modal share). A realistic look at the first monitoring report and modal share will be viewed after 3-6 months occupancy of the building following completion of the first Travel Pattern Surveys.
- 7.9 The precise modal split targets for the development will be determined through the results of the travel pattern surveys which will continue to be undertaken by the TPC on an annual basis. These surveys can only be undertaken once the development is fully operational and will allow the measures and incentives to be re-assessed and specifically targeted to provide a more efficient and relevant TP. An example of a travel survey is provided in Appendix B.
- 7.10 A Travel Plan containing only marketing and promotion is unlikely to achieve any modal shift, however if discounts on public transport are offered, then a 10% reduction is possible. DfT guidance notes that 'targets take around 3-5 years to achieve' and that 'only in very exceptional cases will the reduction be greater than this'.
- 7.11 The Table 7 presents the estimated baseline multi-modal share of the proposed development. The targets for years 3-5 will need to be adjusted based upon the results of the initial surveys but have been initially proposed.

Table 7: Baseline multi-modal split target

Mode of travel	Target (%)		
	TRICS Baseline	Year 3	Year 5
Car	51%	46%	41%
Car Share*	0%	1%	2%
Cycling	2%	3%	4%
Walking	30%	31.5%	33%
Public Transport	17%	18.5%	20%

** TRICS does not contain car share trip rates as a category. Car share is targeted towards staff only.*

- 7.15 Table 7 provides in the form of modal-split percentages. Car usage is proposed to reduce by 10% within 5 years with more encouragement for staff and visitors to walk, cycle and use public transport to access the site. Car share is also targeted for increase in relation to staff trips, if the travel surveys outline an opportunity to do so.
- 7.16 Given the walking and cycling catchment areas, as established in figures 4 and 6, with bus service providing a cumulative frequent service within acceptable walking distance, excellent provision of walking infrastructure/routes and designated cycling routes, it is likely a shift towards sustainable modes of transport is achievable.
- 7.17 Therefore, on first occupation of the development and within 3 months, the operator should commit to conducting travel pattern surveys to establish the realistic modal split of the development.
- 7.18 The targets consider the locality of the site, being within Hinckley and the wider urban area, which provides the site sufficient walking, cycling and public transport catchment areas and provision.
- 7.19 The main emphasis is on reducing vehicular trips. Whilst these targets aim to encourage a balanced approach to sustainable transport, each sustainable mode has merits in their own right and are essentially equally encouraged. For example, public transport is a more feasible option than walking for longer trips. Vehicular trips can also be reduced by promoting use of car sharing among staff.
- 7.20 Once the baseline modal split has been established via the initial Travel Pattern Survey, the next step is to establish how the TP could further promote sustainable travel such as walking, cycling and public transport. DfT best practice and TfL guidance suggests that a strong relationship exists between the potential for changes to the modal split and the measures and incentives proposed in the TP and therefore appropriate and realistic targets are essential to the success of the Travel Plan.

8 Measures

It is important that the measures to meet the stated objectives and targets are set out as fully as possible, because these will determine the potential of the plan to bring about a modal shift. Assessment of the success of the Travel Plan will be based upon its potential to lessen the transport implications of the site and bring about a change in modal share.

8.1 Research suggests that the most successful Travel Plans incorporate a comprehensive range of measures, both ‘carrots’ and ‘sticks’ with incentives introduced first.

8.2 The specific measures to be adopted to support and achieve the Targets previously outlined are given in this section.

The following measures have been included based on best practice, experience and where appropriate, as per local policies Core Strategy DPD (Hinckley & Bosworth Borough Council, 2009), Site Allocations and Development Management Policies DPD (Hinckley & Bosworth Borough Council, 2016) and as recommended in ‘Travel Plans, Transport Assessments and Statements’ Ministry of Housing, Communities & Local Government (MHCLG, 2014).

8.3 Measures to encourage a shift from single occupancy car use, in favour of walking, cycling and car sharing will be implemented. The timeframe and responsibility for each measure is also provided as follows:

TPC = Travel Plan Co-ordinator

D = Developer

8.4 Measures to Promote Walking

In order to encourage pedestrian travel to and from the development, the following measures and incentives will be implemented:

Table 8: Walking

Measures to Encourage Walking		Time Frame	Responsibility
1	Provision of appropriate, well lit, safe walkways and footpaths on approach to the development and ensure there are adequate pedestrian access points, within the scope of the application site.	Prior to occupation	D
2	Ensure provision of suitable lighting, landscaping and shelter within the layout of the site.	Prior to occupation	D
3	<p>Promotional events and literature to emphasise health benefits. Information can be found online including:</p> <ol style="list-style-type: none"> 1. walkit.com is a facility to plan walking in urban environments 2. The local authority provides information on walking routes/events and the importance of walking (See section 5) 3. Walk More ... Feel the Difference promotes the health benefits of walking, and helps people get started with walking 4. National Walking Month is an annual event to promote walking and increase health benefits <p>The Local/Highway Authority often have available literature that can be provided to local people and businesses, the TPC will liaise with the Local Authority (LA) to ensure the most up to date information and details of events are provided</p>	Continuously	TPC
4	<p>Travel information to be displayed on the Travel Information Board at key locations within the development and accessible for all users (See section 5).</p> <p>Details of pedestrian routes and good quality footways to and from key destinations. The map will also show the distances and journey times to these key destinations. Such as food shops, transport interchanges such as bus stops and train stations.</p>	Within first 2 months of occupation and Continuously thereafter	TPC
5	The measures will be marketed through the use of posters, notice board/public transport information systems and online. These forms of media should also be accessible and inclusive for disabled persons. (See section 5)	Immediately / continuously	TPC

6	Notify all site users of the ongoing walking routes around the council on foot. More information on these routes can be accessed via the Council's webpages (See section 5). Walking conditions on the local highway network for pedestrians and vulnerable roads users are highlighted within Section 6.	Within first 2 months of occupation and continuously thereafter	TPC
7	Provision of "free to borrow" umbrellas in the reception area for members of staff who require them if caught out by inclement weather conditions.	Immediately / continuously	TPC
8	Provision of high-visibility reflective and personal alarms clothing for any members of staff who require them.	Immediately / continuously	TPC
9	Provide guaranteed ride home i.e. taxi or car lift for staff who walk and who may require urgent transport in case of an emergency.	Immediately / continuously	TPC
10	Implement a walking buddy scheme for staff to encourage active participation and positive encouragement for walking to the development.	Immediately / continuously	TPC

8.5 Measures to Promote Cycling

In order to encourage cycle travel to and from the building by staff and visitors, the following measures and incentives will be implemented:

Table 9: Cycling

Measures to Encourage Cycling		Time Frame	Responsibility
1	Ensure provision of suitably lit, safe cycle routes, adequate signage and convenient crossing points to and from the site, within the scope of the application site.	Prior to occupation	D
2	Provision of appropriate, well lit, safe cycle routes on approach to the development. Ensure there are adequate cyclist access points, crossings and sufficient signposting, within the scope of the application site.	Prior to occupation	D
3	<p>Promotional events and literature to emphasise health benefits and tax initiatives such as Cycle2Work. Information can be found online including:</p> <ol style="list-style-type: none"> 1. Cycle Streets is a journey planning facility 2. Cycle Scheme is a cycle to work scheme that employers should consider signing up to 3. Bike Week is an annual event to encourage more people to cycle 4. Sustrans provides maps and guidance to encourage cycling 5. The local authority provides information on cycling routes and events (See section 5) <p>The Local/Highway Authority often add to the available literature that can be provided to local people and businesses, the TPC will liaise with the LA to ensure the most up to date information and details of events are provided.</p>	Immediately / continuously	TPC
4	The provision of a cycle route map, to be displayed on the Travel Information Board. This will detail all the “on and off-road” cycle routes, the location of any secure cycle parking areas and the distances and journey times to key destinations such as local shops and transport interchanges.	Immediately / continuously	TPC
5	Detailed cycling information including issues on safety, security and promotions such as National Cycling Week would be provided on the Travel Information Board.	Continuously	TPC

6	Posters highlighting benefits of cycling displayed on the Travel Information Board to encourage more to cycle. Further promotion can be found through the website www.sustrans.org.uk and will be advertised on the Travel Information Board and promoted on posters.	Continuously	TPC
7	The measures will be marketed through the use of posters, leaflets, notice boards and online.	Immediately / continuously	TPC
8	Provide incentives for people to cycle, for example, free cycle clips, helmets and discounts at local cycling shops, vouchers to purchase bikes, or other cycle equipment.	Continuously	TPC
9	Form a bicycle users group (BUG) and offer cycle training or a bike buddy scheme for those not confident about cycling.	Within 6 months of occupations and continuously thereafter	TPC
10	Information on the key cycle network routes including routes to and from the nearest access point. Highlighting the accessibility of these routes could encourage the staff and visitors to cycle more often.	Within first 2 months of occupation and Continuously thereafter	TPC
11	Ensure provision of secure and covered cycle parking, in accordance with the relevant standards.	Prior to occupation	D
12	Ensure the provision of changing rooms, shower facilities and locker facilities.	Prior to occupation	D

8.6 Measures to Promote Public Transport Use

In order to encourage public transport based travel to and from the building, the following measures and incentives will be implemented:

Table 10: Public Transport

Measures to Promote Public Transport Use		Time Frame	Responsibility
1	<p>Provide public transport routes, bus stop locations and timetable information. This will be advertised and provided to all site users displayed on the travel plan notice board/public transport information system. This information should be accessible for all site users (See section 5 and 6).</p> <p>In addition, live travel information will be publicised such as on the notice board/public transport information systems strategically located in a prominent location.</p>	Immediately / continuously	TPC
2	Ensure all site users are aware of public transport routes to and from the premises. The information will also be made available to download online.	Within first 2 months of occupation and Continuously	TPC
3	Ensure that local bus shelters are adequately lit and in satisfactory condition, within the scope of the application site.	Immediately / continuously	TPC
4	Ensure that all members of staff who are eligible for a bus pass have support to apply for one.	Within 3 months occupation	TPC
5	Raise awareness of the Council's Motability Scheme which enables disabled people to own a car, powered wheelchair or scooter, in order to enable people to travel short journeys on a mobility scooter instead of for example being dropped off by car.	Within 3 months occupation	TPC
6	Offer members of staff who travel to work via public transport the chance to adjust their start and finish times to suit public transport timetables where possible.	Immediately / continuously	D
7	<p>The measures will be marketed through the use of posters, leaflets, notice board/public transport information systems, presentations, events and online.</p> <p>This information should be accessible for all site users. See section 5.</p>	Immediately / continuously	TPC
8	<p>Promotional events and literature to emphasise health and economic benefits. Information can be found online including:</p> <p>https://bususers.org/catchthebusmonth/</p>	Immediately / continuously	TPC

	The local Authority often add to the available literature that can be provided to local people and businesses, the TPC will liaise with the LA to ensure the most up to date information and details of events are provided.		
9	Consider providing a staff season ticket or staff discount for public transport.	Immediately / continuously	TPC

8.7 Measures for Sustainable Car Use

The benefit of sharing a lift between friends that are already known to each other is recognised as a valuable method of reducing the number of cars driving to the development. A reduction in single occupancy car travel amongst staff and visitors will be encouraged by supporting the sharing of lifts. In order to encourage staff and visitors to share lifts the following measures and incentives will be implemented:

Table 11: Car use

Measures to Reduce Car Use		Time Frame	Responsibility
1	Raise awareness of the cost savings that could be made by finding alternatives to the motor car.	Immediately / continuously	TPC
2	Set up and market a “car-share matching service” for travel to work and/or promote car sharing services.	Within 6 months of occupation	TPC
3	Car share meet for staff to meet each other and discuss car share opportunities.	Continuously	TPC
4	Consider implementing restrictions to car parking.	Within 6 months of occupation	TPC
5	Following measure 5 and given the number of spaces, it could be necessary to restrict car parking to staff, with visitors using the local public car parks to access the site if required; Implement a car park management plan to manage and monitor the capacity/occupancy of the car park If at capacity, implement mitigation measures to reduce indiscriminate off-street parking i.e install signage to direct visitors to public car parks, make visitors aware of parking arrangements etc	Immediately / continuously	TPC
6	Ensure the provision of changing rooms, shower facilities and locker facilities.	Prior to occupation	D

8.8 Other Supporting Measures

The following measures will be considered to further encourage sustainable travel options amongst site users:

Table 12: Supporting measures

Supporting Measures		Time Frame	Responsibility
1	If applicable, provision of travel packs to new staff members. Information on sustainable travel including cycling, walking and public transport services and routes and useful contact numbers.	Immediately / continuously	TPC
2	Offer personalised journey planning facility for members of staff via the websites https://www.traveline.info/	Continuously	TPC
3	Ensure completion of annual travel surveys to monitor the travel access of the site.	Annually from the date of occupation	TPC
4	Information for those with mobility impairments to be displayed in a prominent location and further detail available upon request	Immediately	TPC
5	Consider the locality of potential staff during the hiring process, to reduce the number of vehicle trips to and from the site. (Please note that this may not always be feasible and should be a consideration factor only i.e kitchen staff is more specialised and may require locality to be a secondary factor)	Immediately / continuously	TPC

8.9 Fleet Management

Effective fleet management can reduce the frequency of vehicles travelling to and from the site, with effective management, routing and safety awareness, impacts from the movement of vehicles to and from the site can be reduced.

- 8.10 Given the nature of the development, measures for effective fleet management are limited in scope. However, several measures are provided to reduce overall mile and fuel usage.

Table 13: Fleet Management

Fleet Management Measures		Time Frame	Responsibility
1	Reduce vehicle trips associated with deliveries to and from the site. Measures to reduce delivery trips could include placing larger orders to reduce frequency and sourcing local suppliers.	Within 3 months occupation	TPC
2	Review the mileage rates of staff, encourage route planning for the most efficient route taken by staff.	Within 3 months occupation	TPC

8.11 Measures to Market and Publicise the Travel Plan

Marketing and Awareness raising strategies will form a key element of the Travel Plan so that all users of the site are made aware of its objectives and are informed of the measures that are being established to help them make informed decisions of their travel mode choice.

8.12 The following measures will be considered to further encourage sustainable travel options amongst site users:

Table 14: Travel Plan promotion

Marketing Measures		Time Frame	Responsibility
1	Ensure that site-wide notice boards, which contain walking, cycling and public transport maps and information, are put up with updates regularly posted online.	Immediately / continuously	TPC
2	Introduce a Travel Plan section online	Immediately / continuously	TPC
3	Provide travel information packs to all new staff on first occupation to ensure site wide recognition and co-operation of the travel plan	Continuously	TPC
4	Regular meetings for communication with staff	Continuously	TPC
5	Co-operate in national promotional events such as Walking Weeks and Bike Week.	Continuously	TPC
6	Personalised Travel Planning for members of staff	Continuously	TPC

9 Monitoring and Evaluation

It is important that the Targets set within the travel plan are actually met. As such, this section sets out the monitoring and evaluative procedures that will be employed.

- 9.1 The Travel Plan Monitoring Period is 5 years from the opening day of the development. The initial baseline survey of staff and visitors will be undertaken within 3 months of occupation and will take place annually for 5 years thereafter. Following the first 5 years the Travel Plan obligation will be reviewed by the Local/Highways Authority.

9.2 Monitoring the Travel Plan

The TPC will provide a Monitoring Report that will be written on an annual basis and issued to the Local/Highways Authority. The date of each report will be the yearly anniversary of first occupation of the development. The template for the report is included in Appendix C.

9.3 Target Monitoring

The primary target will be monitored in the form of modal trip generations, as stated in Section 7 given in line with the baseline data.

- 9.4 Measures implemented as part of the Travel Plan will be subject to ongoing monitoring as part of the Travel Plan process. The Travel Plan Co-ordinator will keep a record of and will monitor specific areas relating to:

- Usage of the on-site parking/ car parking demand
- Cycle parking usage
- The number of people cycling
- The number of people walking
- Take-up of public transport usage
- The number of people taking up cycle loans or Bicycle User Group (BUG) membership
- Numbers of car sharers
- Identification of potential new measures to include within the Travel Plan

9.5 Reporting

The results of the surveys undertaken will be periodically disseminated to all staff and visitors to the site. The TPC will be committed to producing an annual monitoring report for the Local/Highways Authority in order to assist in monitoring compliance. The monitoring report will also include any relevant information on changes of personnel, partnerships with other organisations and provide brief details of plans for the forthcoming year.

- 9.6 The results of the annual Travel Pattern Surveys will also be included in the Monitoring Report submitted to the Local/Highways Authority.

9.7 Reviewing the Travel Plan Document

The Travel Plan itself will be a "living document" and as such, the organisation is committed to giving an annual review and evaluation to the local authority. Travel pattern surveys will be carried out to allow the review of targets and the necessary adjustments.

- 9.8 Although monitoring is only required for this period, the Travel Plan should continue to operate beyond this period. Monitoring will ideally continue on a voluntary basis every two years thereafter.

10 Remedial Actions/Fall-back Measures

It is important that the Targets set are being met and as such, this section sets out the remedial/fallback measures that may be required if the development is not approaching the agreed Targets. The following remedial measures will be put into place will the Targets fail to be met.

10.1 Monitoring

If the travel plan is not meeting its targets after the agreed timeframe for monitoring, the monitoring period (including associated reporting) will continue for a further 5 years. The Local Authority expect steps to be taken to improve the Travel Plan measures to achieve targets.

10.2 Measures

The Travel Plan will include consideration of:

- Further funding allocated in order to provide support to the Travel Plan Co-ordinator
- Additional infrastructural (i.e. parking provision/management) actions that are inclined towards the promotion of sustainable travel
- Additional promotional (i.e. free public transport tickets, participation in national events) actions that are inclined towards the promotion of sustainable travel

Appendix B - Travel Survey Template

Travel Pattern Survey

To help us understand the travel patterns of our staff, we are undertaking this short survey. This information will be used to inform the Travel Plan process for the site.

Please enter X in the appropriate shaded boxes below.

Section A - About You

What is your home postcode?

Post code

Which age bracket are you?

under 25

25-34

35-44

45-54

over 55

Section B - About Your Job

Do you work from home or company workplace?

Home

Work

Both

4 Which days do you normally work?

Home

Workplace

Monday

Tuesday

Wednesday

Thursday

Friday

Saturday

Sunday

5 What time do you normally arrive at work?

07:00 - 07:30

07:31 - 08:00

08:01 - 08:30

08:31 - 09:00

09:01 - 09:30

09:31- 10:00

10:01 - 10:30

Other (please specify time)

6 What time do you normally leave work?

15:00-15:30

15:31-16:00

16:01-16:30

16:31-17:00

17:01-17:30

17:31-18:00

18:01-18:30

18:31-19:00

Other (please specify time)

7 Do you work Full Time or Part Time?

Full Time

Part Time

8 Do you work shifts?

No

Yes

(please specify times)

Diagram illustrating a sequence of four rectangles. The first two rectangles are small and stacked vertically. The third rectangle is wider and labeled "start" on its right side. The fourth rectangle is the widest and labeled "finish" on its right side.

9 Do you work flexitime?

No

Yes

(please specify times)

Section C - About Your Journey to Work

10 How long does it take to travel to work?

0-15 mins

16-30 mins

31-45 mins

46-60 mins

Over 60 mins (please specify)

11 How do you mainly travel to and from work?

Car (driving on my own)

Car (car-share)

Motorbike

Taxi

Bus

Train

Cycle

Walk

Other (please specify)

[illegible]

12 What is the main reason for using this mode of travel?

Essential
Dropping off passenger
Health reasons
Saves time
Saves money
Safety
Need to for work purposes
No alternative

13 How far do you travel to work?

Less than 2km (1.25 miles)
2km - 5km (1.75 - 3 miles)
5km - 10km (3 - 6 miles)
10km - 20km (6 -12 miles)
20km - 30km (12-19km)
Over 30km (19 miles) please specify

14 If you drive a car to work, where do you usually park?

In work car park
Free on street parking
Paid on street parking
Paid car park

Section D - Increasing Choice

15 Which of the following would encourage you to walk to work?

Nothing, I already walk
Safer, better lit foot paths
Changing facilities at work
Walking not viable for me
Other (please specify)

16 Which of the following would encourage you to cycle to work?

- Nothing, I already cycle
- Safer, better lit cycle paths
- Changing facilities at work
- Secure cycle parking
- Tax-free loan scheme
- Cycling not viable for me
- Other (please specify)

17 Which of the following would encourage you to use public transport to work?

- Nothing, I already use public transport
- More direct routes
- More frequent services
- More timetable information
- More reliable
- Cheaper fares
- More difficult/expensive to park my car
- Other (please specify)

18 Which of the following would encourage you to 'car share' to work?

- Nothing, I already car share
- Help to find car share partners
- Reserved parking for car-sharers
- Free taxi home if let down by driver
- Reduced parking cost for car-sharers
- Other (please specify)

Thank You!

Appendix C - Travel Plan Monitoring Report Template

Monitoring Report – Template Contents

The Travel Plan monitoring report should provide details of the monitoring and evaluative procedures that have been employed. A monitoring report should be written on an annual basis and distributed to both District and County Councils. As such, the report should be dated.

Introduction and Context of Travel Plan

This section should detail:

- Nature of the organisation: site address, date of site occupation, details of commercial occupiers (if known), staff / resident numbers (total number of full-time, part, shift employees),
- Working hours. Hours of operation, shift hours – approx no of staff on these shifts.
- The targets proposed for the site (from the agreed Travel Plan).
- Outline of any planning obligations / conditions (including date of agreement, objectives / conditions met, date objectives / conditions met,
- Summary of information gathered, (Details of multi-modal counts, when the travel survey was issued, and what rate of return was achieved),
- The method used to gather information,
- Indication of annual budget / spend for the TP (£ per annum) or how much time is allocated to for the TP? (Hours)
- Summary Analysis of information with respect to the Targets, and previous monitoring reports.

Progress

This section should detail the progress made since the last report submission. It also includes any relevant information on changes of personnel, partnerships with other organisations.

Summary of Results

This section summarises and discusses the results of surveys / monitoring conducted during the year.

The structure of this section would focus on:

Primary Target Monitoring

- Traffic count and travel survey information should be summarised with respect to progress towards the 'primary target'.
- The results should be presented in a table also showing modal split.
- This information should be presented against all previous recorded counts and modal splits as part of ongoing monitoring and discussion.
- Staff travel patterns and any issues identified in the travel survey (i.e. time of travel and travel between sites) can be discussed.

Secondary target monitoring

- The measures implemented (as part of the Travel Plan) that support the achievement of 'secondary targets' should be summarised and discussed. This could include:
 - Occupancy/demand for parking spaces provided (car / motorcycle / bicycle) (How often does demand for car parking exceed capacity?)
 - Numbers of parking spaces assigned to disabled, visitors, carsharers and staff
 - Numbers enrolled on the car-share scheme (if relevant)
 - The up-take of discounted public transport tickets (if provided)
 - Does the organisation adopt 'smart' working practices from the list below?
 - Flexi-time, teleworking, teleconferencing, audio-conferencing, home working, hot-desking

Target Progress

This section should detail the effectiveness of the above mentioned measures implemented so far, with respect to target achievement (including summary reporting of previous survey results). It should also detail the measures to be implemented if otherwise.

Issues

This section should address the issues encountered since the previous monitoring report submission. This can also include any issues overcome and any not yet resolved.

Priorities and Actions

This section should detail brief plans for the forthcoming year. Particular measures could be prioritised, dependent on their successful contribution towards targets / uptake. This could include a discussion of actions / measures that will help meet targets for the next year.

Appendix D - Site plans

GENERAL NOTES

1. Do not scale off this drawing unless a scale bar is provided
2. Any ambiguities, omissions and errors on this drawing should be notified immediately to the Architect before the commencement of works on site
3. Dimensions are in millimetres unless otherwise stated
4. Dimensions, unless otherwise indicated, are to the face of unfinished block walls or to the finished plaster face of stud partitions
5. Dimensions are to be checked on site. Discrepancies are to be notified immediately to the Architect before the commencement of works on site
6. All levels are in meters unless otherwise stated
7. This drawing is to be read in conjunction with all other relevant drawings and specifications for this project

CDM REGULATIONS

 Denotes a significant hazard or difficult to manage procedure. Please refer to Designer Hazard Register for further information regarding mitigation of hazards.

Appendix F - TRICS data

Calculation Reference: AUDIT-700101-250319-0355

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 05 - HEALTH
Category : F - CARE HOME (ELDERLY RESIDENTIAL)
MULTI-MODAL TOTAL VEHICLES

Selected regions and areas:

01	GREATER LONDON	
	IS ISLINGTON	1 days
	KI KINGSTON	1 days
02	SOUTH EAST	
	WS WEST SUSSEX	1 days
04	EAST ANGLIA	
	PB PETERBOROUGH	1 days
06	WEST MIDLANDS	
	SH SHROPSHIRE	1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE	
	NY NORTH YORKSHIRE	1 days
09	NORTH	
	TW TYNE & WEAR	1 days
11	SCOTLAND	
	EB CITY OF EDINBURGH	1 days
14	LEINSTER	
	WX WEXFORD	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: Number of residents
 Actual Range: 48 to 89 (units:)
 Range Selected by User: 40 to 120 (units:)

Parking Spaces Range: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/16 to 21/04/24

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	1 days
Tuesday	3 days
Thursday	2 days
Saturday	1 days
Sunday	2 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	9 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Suburban Area (PPS6 Out of Centre)	9
------------------------------------	---

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	9
------------------	---

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Inclusion of Servicing Vehicles Counts:

Servicing vehicles Included	7 days - Selected
Servicing vehicles Excluded	2 days - Selected

Secondary Filtering selection:

Use Class:

C2	9 days
----	--------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 500m Range:

All Surveys Included

Secondary Filtering selection (Cont.):

Population within 1 mile:

5,001 to 10,000	2 days
10,001 to 15,000	1 days
20,001 to 25,000	1 days
25,001 to 50,000	4 days
100,001 or More	1 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

25,001 to 50,000	1 days
75,001 to 100,000	1 days
100,001 to 125,000	1 days
125,001 to 250,000	2 days
250,001 to 500,000	2 days
500,001 or More	2 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.5 or Less	1 days
0.6 to 1.0	4 days
1.1 to 1.5	4 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

No	9 days
----	--------

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	7 days
2 Poor	1 days
4 Good	1 days

This data displays the number of selected surveys with PTAL Ratings.

Total Rates:			0.867			0.887			1.754

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. Parameter summary

Trip rate parameter range selected: 48 - 89 (units:)
Survey date date range: 01/01/16 - 21/04/24
Number of weekdays (Monday-Friday): 6
Number of Saturdays: 1
Number of Sundays: 2
Surveys automatically removed from selection: 0
Surveys manually removed from selection: 0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
