

EXISTING SITE PLAN

scale 1:1000 @ A1

DRAWING TO BE READ IN COLOUR

PETER SMITH ASSOCIATES Architects

- Notes:
- Contractors must check all dimensions on site. Only figured dimensions are to be worked from. Discrepancies must be reported to the Architect or Engineer before proceeding. © This drawing is copyright
 - Reproduced from OS Sitemap © by permission of Ordnance Survey® on behalf of The Controller of Her Majesty's Stationary Office. © Crown copyright 2008. All rights reserved. Licence number 09457549.
 - Do not scale off this drawing. Work to written dims only and any discrepancies to be notified to the architect.
 - This drawing must be read in conjunction with all other relevant Architects, Structural Engineers, M&E Engineers, and all other relevant consultants drawings details and specifications.

KEY:

- SITE BOUNDARY
- - - PUBLIC FOOTPATH

PROW (denoted by the green line on the site plan) is to be retained as part of the development. During construction herras fencing supported on rubber footings or similar may be erected along elements of the footpath to provide site security during the works and to help maintain the footpath. The site boundary will be regularly maintained. Daily inspections will take place during the construction work to ensure that any temporary fence is not compromised. Dust monitoring will take place during construction to safeguard the amenity of the route.

The contractor has specified that they will work in 4 man teams - 2 operatives will be removing the old fence while the other 2 will be replacing the panels behind them as they go - by working to this approach the contractor is hoping to keep the site secure and limit gaps in the secure line reducing the need for herras fencing along the public footpath.
