Thank you for consulting the Forestry Commission on this proposal.

We welcome proposals for significant additional woodland planting which will link with the existing woodland both onsite and adjacent to the site, this is positive and in line with National Forest guidelines.

We would recommend that an arboricultural method statement is produced detailing the protection measures for existing trees on site during construction. Also that when detailing a lighting strategy for the proposal that care is taken to avoid illuminating the existing woodlands.

The species and provenance of new trees and woodland also needs to be considered to ensure a resilient treescape which can cope with the full implications of a changing climate. The biosecurity of all planting stock also needs to be considered to avoid the introduction of pests and diseases.

Plans should also be in place to ensure the long term management and maintenance of new and existing trees and woodland.

If you need any further information, please do not hesitate to contact me.

Best wishes

Sandra
