Dear Richard,

Further to our telephone conversation please find enclosed amended drawing 5531a, the FFL of the proposed dwelling has been lowered by 300mm, and is now .2m above the datum point located in front of the property. The drawing is best viewed with drawing 5531 to give a prospective view, the ridge height will appear lessened by the angle to Summers Close. I have amended the planning layout drawing showing the new drive position to accommodate the visibility splays

Regards
Mitchell Green
