These books are a good introduction to the subject, and are well priced at about £15. I strongly recommend the short but excellent book by *James G. Thompson* on "The Economics of the World's Great Cities" (London: George Allen and Unwin, 1966). It is written in a very readable style and contains a number of interesting facts and figures. It is also a good introduction to the subject of urban economics. The book by *John F. Kennedy* and *John A. Bui* "The Economics of the World's Great Cities" (London: George Allen and Unwin, 1966) is also a good introduction to the subject. Other people have interpreted the results differently. For example, some have said that the study is inconclusive because it does not tell us how many people were actually exposed to the virus. Others have said that the study is inconclusive because it does not tell us how many people were actually infected with the virus. However, the study does provide some evidence that the virus is spreading in the community.
