Please note we cannot accept late or out of date submissions. All articles must be received by the editorial office by 11.59pm on the day before publication. If you are unable to submit your article online, you will need to bring a hard copy to the editorial office. All articles must be submitted within 21 days of the date of the event. If your comments are received and published within 21 days of the date of the event, you will be notified by email. If your comments are not published, you will be notified by email. If you have any queries, please contact the editorial office on 020 7779 7779. Your email address, in the event of a successful article, will remain confidential and will not be used for any other purpose.

Christopher Bryan WRTM
Head of Planning

16/12/24

IMPORTANT
Publication information

By the end of the course, students will be able to:

- 1. Identify the various types of research methods used in psychology and discuss the strengths and weaknesses of each.
- 2. Design a research study and write a research proposal.
- 3. Collect and analyze data using statistical methods.
- 4. Interpret and communicate research findings.

The course is designed to provide students with a solid foundation in research methods and to prepare them for more advanced study in psychology. The course is also designed to provide students with the skills and knowledge needed to conduct research in psychology.

Students who complete this course will be able to:

- 1. Identify the various types of research methods used in psychology and discuss the strengths and weaknesses of each.
- 2. Design a research study and write a research proposal.
- 3. Collect and analyze data using statistical methods.
- 4. Interpret and communicate research findings.

The course is designed to provide students with a solid foundation in research methods and to prepare them for more advanced study in psychology. The course is also designed to provide students with the skills and knowledge needed to conduct research in psychology.
