Comments Details

Comments:

Please can the applicant provide any details regarding noise from the operational phase? The design and access statement states that inverters will be frame mounted at the end of each run of panels- I would assume that any noise would be generated at this point, will the inverters be located to the western aspect of the site?

I would recommend that site hours for the construction phase are conditioned:
Site Preparation and construction shall be limited to the following hours:
Monday - Friday 07:30-18:00
Saturday - 08:00-13:00
No working on Sundays and Bank Holidays.

Kind regards
