ECOLOGICAL DOCUMENTS REVIEWED:	
Non-Licensed Method Statement for Bats – Croft Ecology (Sept 2026)	
SUMMARY RECOMMENDATION:	
No comment	
No objection (for recommended conditions or informatives- see below)	
Recommend Refusal	
Holding Objection - Further information required	✓
REASON FOR RECOMMENDATION:	
- The Non-Licensed Method Statement for Bats has been reviewed and revised to address our previous comments. The precautionary working methods are welcomed however, we have outstanding requirements regarding the submission of bat box locations. - Therefore, our previous comments still stand: - The statement should also provide details of the roosting provisions to be incorporated within the completed development. - The proposed bat box on the nearby tree is suitable as a roost should be provided prior to the works being carried out and ensuring that it is not to be disturbed whilst works are being completed. - A permanent roosting provision is also required to encourage bat roosting. This should consist of a preferably integrated/woodcrete bat box within the new building, located on B1. - To address this, the statement should include: - The bat box type, specification (e.g. make and model), of both pre commencement and permanent roosting provisions.	

- A clear illustration (elevation drawing or annotated plan) showing the location of all the proposed bat boxes and bird boxes (proposed in Section 4.5 of the report). • We have a holding objection.
