SECTION 1: PARKING PROVISIONS.....	3
1 Existing Parking Arrangement	3
2 Proposed Development and Impact on Parking.....	3
3 Summary.....	3
4 Additional Parking Details.....	3

This Parking Provisions document has been prepared by **Lights for Sport** exclusively in support of a planning application commissioned by **Congerstone Primary School**. It contains proprietary information and technical analysis that must not be disclosed to any third party or used for any purpose other than the assessment of this application, without the prior written consent of either Lights for Sport or Congerstone Primary School.

SECTION 1: PARKING PROVISIONS

1 Existing Parking Arrangement

Congerstone Primary School benefits from an established on-site parking area, located adjacent to the main entrance. This area provides off-street parking for staff and visitors during school hours. Additional hardstanding areas within the school grounds are available for temporary or overflow parking during school events.

2 Proposed Development and Impact on Parking

The current planning application relates solely to the installation of floodlighting to the existing MUGA and does not involve any new building development or increase in site capacity. The project is intended to extend the hours of usability for an existing facility, primarily for school and local community use during darker months. As such:

- There is no change to the number of users or staff directly resulting from the lighting installation.
- No additional parking demand is anticipated beyond occasional after-school or early evening community use.
- The existing school parking provision is sufficient to accommodate these users without impacting the surrounding roads.

3 Summary

The proposed lighting installation has no adverse impact on parking or traffic. All activity associated with the MUGA will continue to be supported by the existing on-site parking infrastructure, and no new parking spaces are proposed or required.

4 Additional Parking Details

The site benefits from a variety of parking spaces distributed around the school, including:

- 10 spaces within the school drop-off bay
- 4 spaces in the bus drop-off area
- 6 hard off-road spaces on the nearby lane (Gopsall Road)
- 5 to 6 spaces on Shackerstone Road toward Congerstone village
- 3 spaces next to the school gates

At least 8 on-road parking spaces along Shackerstone Road toward Shackerstone.

This results in approximately 30 parking spaces available in total. It is worth noting that during school drop-off and pick-up times, many more cars can be accommodated in the vicinity without impacting road safety or access, as evidenced in the accompanying photos.
