Specification for replacement windows

Method for construction.

Windows all to be constructed traditionally with mortice and tenon joints.
Sections and sizes to match existing.

Installation.

Windows to be installed and any requirements to aperture will be carried out showing sympathy to the building i.e. matching fascia timbers to dormer roof

Specification of windows.

1. Manufactured from Sapele Hardwood.
2. Style to match existing windows.
3. Flush fitted casements set inside bevelled jambs as per drawing.
Weather seals fitted to rebates.
4. Sections of timber as existing
Approx. 120mm x 120mm windows.
45mm x 45mm casements.
5. Window fasteners fitted with friction hinges to top hung centre casements.
6. Double glazed heritage units 14mm thickness (spec attached)
7. Astragal glazing bars to be used to minimise timber glazing bars.
8. Windows to be coated with 2 coats of Undercoat and 2 coats of top coat.
