BIODIVERSITY REPORT – September 2008

RE: PROPOSED EXTENSION AND ALTERATION TO FORM ENLARGED KITCHEN, & DINING ROOM TO HALL FARM, OSBASTON. CV13 0BW

LAUREL TREE REMOVAL.

The proposal will involve the removal of a 3.5m high ornamental standard trained Laurel Tree. These works are to be undertaken during November of this year to avoid disturbance of nesting birds and foliage will be removed first to avoid interference of roosting or nesting protected species of Bat.

There is an abundance of trees and shrubs on this plot and to its perimeter boundaries and thus there will be no ecological impact as a result of this tree removal.
