SUMMARY OF ECOLOGICAL DOCUMENTS CONSIDERED:	
- Proposed floor plans and elevations - 4/11/24 - Existing floor plans and elevations - 4/11/24 - Roof plans, block and location plan - 4/11/24	
REASON FOR RECOMMENDATION PROVIDED:	
- The proposed works consist of a single storey and two storey extension. - The development is sited nearby countryside and has good connectivity to nearby ponds. Therefore, this habitat could provide suitable foraging and good connectivity routes for bats. - The works involve extensive alterations to the roof line, soffits, the tiled front of the roof and the chimney stack, where the proposed two storey development is to tie into the existing building. - Bats are particularly associated with the roof structure of buildings. Therefore, the submission of a Preliminary Roost Assessment (PRA) will be required on the existing dwelling prior to commencement. The survey will need to be carried out by a suitably licenced ecologist and can be carried out at any time of year. The PRA report should include internal and external photographs.	

I have a holding objection until this is supplied.
