ECOLOGY REPORT

BIODIVERSITY SURVEY

FOR

PROPOSED DEVELOPMENT AT

4 SALISBURY CLOSE DESFORD LE9 9HJ

A thorough survey of the site including the existing dwelling loft space has been undertaken and there are no visible signs of bats. Walls and paths around the property were examined and no droppings were found. Verges, soffits and facias were looked at very closely and no gaps were visible.

The garden areas were looked at and there is no evidence of great crested newts, door mice or badgers.

Information obtained from the following organizations has assisted in the above:
