Proposed Formation of Two Storey Extension with Open Terrace at Upper Floor Level.

Landscaping Proposals.

1, Soft Landscaping.

The formation of this new two storey extension will not have any detrimental impact on the current soft landscaping around the site, and therefore no alterations to the sites soft landscaping is proposed.

2, Hard Landscaping.

The formation of this new two storey extension will not have any detrimental impact on the current soft landscaping around the site.

As part of the proposals the existing external bottle bar (and its timber roof construction) adjoining the paved patio will be removed, and the paved patio surface will be extended slightly to ensure that the double swing doors from the Ground Floor Level open onto a hard surface, as opposed to opening onto a grassed surface.
