Supplementary Planning Statement to clarify description of works on planning application

FS/007

1) The description of the works on this planning application states "Erection of covered storage area over existing open air store. New building to include provision for constructing new roof over existing covered storage areas"
2) This planning application is intended to cover only the erection of a single mono-pitched extension as shown on the plans submitted.
3) It is not the purpose of this application to seek approval for the erection of a new roof over the existing storage areas. This is mentioned only to clarify and justify the new design and to explain why it is proposed to raise the ridge height.
4) When, in the future, it is decided that a new roof is required, a new and specific planning application will be made for this proposal.
